

STI PERFORMANCE PARTS

LEVORG (VN)

Chassis/Body

**FLEXIBLE TOWER BAR FRONT**

ST20502VR010

This is a strut tower bar with a completely new concept - splitting an aluminum tower bar in the center and connecting the two pieces with pillow ball joints. As the left and right pieces are flexibly connected, the bar can moderately handle longitudinal forces such as from gaps on the road to maintain ride comfort while strongly holding against lateral forces during cornering. As a result, not only cornering performance but also straight-line stability and ride comfort is improved to enhance the comprehensive performance level of the car.

* Not applicable with all left-hand drive car and right-hand drive with MT car.

**FLEXIBLE DRAW STIFFENER Rr**

ST20168VR000

In addition to increasing the rigidity at the front of the car with the FLEXIBLE V BAR or FLEXIBLE TOWER BAR, we recommend that you also install this product, to improve the followability of the rear of the car together with the FLEXIBLE V BAR or FLEXIBLE TOWER BAR.

By attaching this to the rear ends of the left and right rear frames (inside the rear bumper) and applying moderate tension, it corrects the bending of the chassis when the car is running. This leads to both initial agile steering and a smooth ride.

As this part improves the road-contact of the four wheels, driving stability during cornering increases, and thus a quick and straightforward steering feeling can be realized.

This product comes with a original sticker. (Sticker size: length 41 mm x width 36 mm)

* To install this product, removal and reattachment of the rear bumper face is required.

* The included sticker is a complimentary gift and not sold separately.

Please note that the sticker is not eligible for repair caused by a mistake in applying or damage in its use.

* The images illustrate how this product is installed on the LEVORG (VN type) and SUBARU BRZ (ZD type).

Please note that this product is actually installed inside the bumper and is not visible from the outside.

* On the LEVORG (VM type) this part cannot be installed together with the STI Rear Under Spoiler (part number: SG517VA360, SG517VA310) because the mounting location is the same.

**FLEXIBLE DRAW STIFFENER F**

ST20118VR000

This STI original sports performance part applies moderate tension between the vehicle body and cross member to prevent the chassis from bending when you drive the vehicle. This results in agile and responsive initial steering, as well as a comfortable ride. The vehicle will boast better grip on all four wheels, improved stability when cornering, and also fast and responsive steering performance.

* The explanation of this product is for Japanese specification.

Suspension

LATERAL LINK SET

ST20250GH000

By replacing the rubber bush with a pillow ball bush inside, the lateral link smoothens the movement of the rear suspension and decreases friction upon stroke as well as improving camber stiffness. This item can deliver sharp handling on corners and linear suspension characteristics from turn-in to acceleration at the exit.

* Alignment work is required.

* To fit this item, 6 SUBARU genuine Self Lock Nuts (902350022), 2 (902330006), 2 Snap Pins (051112001) are additionally required. For further details please inquire at a SUBARU dealership.

STI PERFORMANCE PARTS

Aero/Exterior

FRONT UNDER SPOILER RED

SG517VC030

This is a plastic aerodynamic control part to be attached to the bottom of the front bumper. By rectifying the airflow received from the front part of the car during high-speed driving and generating negative lift, this part improves the grounding property of the front tires. The shape, built with a sense of unity with the front bumper has been verified for performance in repeated wind tunnel experiments to achieve both good design and performance. Painted in Cherry red. This comes with an emblem with the STI logo. By installing the separately-sold SKIRT LIP, the rectification effect will be further enhanced and the FRONT UNDER SPOILER will be protected from contact with the road surface.

- * This product cannot be installed together with the FRONT BUMPER SKIRT BLACK/COLORED.
- * The installation of the FRONT UNDER SPOILER will reduce ground clearance by up to 53 mm.

SIDE UNDER SPOILER RED

SG517VC130

This is an aerodynamic part that rectifies the air flowing from the front to the body side of the car and enhances driving stability. This product rectifies the airflow directed to the rear side. Painted in Cherry red.

- * This product cannot be installed together with the AERO SPLASH GUARD, SIDE STRAKE or SIDE UNDER SKIRT.
- * The ground clearance from the mounting area will reduce by up to 15 mm.
- * A left/right set (for one vehicle).

REAR SIDE UNDER SPOILER RED

SG517VC230

This aerodynamic part rectifies the flow of air from front to rear and optimally balances the aerodynamic performance throughout the vehicle. Painted in cherry red.

- * This product cannot be installed together with the SUBARU genuine accessory, AERO SPLASH, REAR UNDER DEFFUSER or REAR BUMPER SKIRT.
- * The ground clearance from the mounting area will reduce by up to 30 mm.
- * A left/right set (for one vehicle)

STI PERFORMANCE PARTS

Aero/Exterior

REAR UNDER SPOILER RED

SG517VC330

This aerodynamic part outfitted with lower vertical fin rectifies the flow of air from front to rear and optimally balances the aerodynamic performance throughout the vehicle. Painted in cherry red.

- * This product cannot be installed together with the REAR UNDER DIFFUSER, REAR BUMPER SKIRT.
- * The ground clearance from the mounting area will reduce by up to 37 mm.

FRONT UNDER SPOILER

SG517VC040

This is a plastic aerodynamic control part to be attached to the bottom of the front bumper. By rectifying the airflow received from the front part of the car during high-speed driving and generating negative lift, this part improves the grounding property of the front tires. The shape, built with a sense of unity with the front bumper has been verified for performance in repeated wind tunnel experiments to achieve both good design and performance. Painted in crystal black silica. This comes with an emblem with the STI logo. By installing the separately-sold SKIRT LIP, the rectification effect will be further enhanced and the FRONT UNDER SPOILER will be protected from contact with the road surface.

- * This product cannot be installed together with the FRONT BUMPER SKIRT BLACK/COLORED.
- * The installation of the FRONT UNDER SPOILER will reduce ground clearance by up to 53 mm.

SIDE UNDER SPOILER

SG517VC100

This is an aerodynamic part that rectifies the air flowing from the front to the body side of the car and enhances driving stability. This product rectifies the airflow directed to the rear side. Painted in crystal black silica.

- * This product cannot be installed together with the AERO SPLASH GUARD, SIDE STRAKE or SIDE UNDER SKIRT.
- * The ground clearance from the mounting area will reduce by up to 15 mm.
- * A left/right set (for one vehicle).

STI PERFORMANCE PARTS

Aero/Exterior

REAR SIDE UNDER SPOILER

SG517VC200

This aerodynamic part rectifies the flow of air from front to rear and optimally balances the aerodynamic performance throughout the vehicle. Painted in crystal black silica.

- * This product cannot be installed together with the SUBARU genuine accessory, AERO SPLASH, REAR UNDER DEFFUSER or REAR BUMPER SKIRT.
- * The ground clearance from the mounting area will reduce by up to 30 mm.
- * A left/right set (for one vehicle)

REAR UNDER SPOILER

SG517VC300 BLACK

This aerodynamic part outfitted with lower vertical fin rectifies the flow of air from front to rear and optimally balances the aerodynamic performance throughout the vehicle. Painted in crystal black silica.

- * This product cannot be installed together with the REAR UNDER DIFFUSER, REAR BUMPER SKIRT.
- * The ground clearance from the mounting area will reduce by up to 37 mm.

ROOF END SPOILER

SG517VC400

This product has a vortex generator shape that rectifies the airflow at the rear of the vehicle. Painted in crystal black silica.

- * This product cannot be installed together with the ROOF SPOILER or ROOF SPOILER FLOATING.

Aero/Exterior

DOOR HANDLE PROTECTOR

ST91099ST150 SILVER

This is a carbon-effect door-handle protector which protects the car from scratches and fingerprints when opening/closing doors.

With the addition of silver color, it is now more suitable for use with silver or white light-colored car bodies.

Designed for a grip-type door handle, this not only serves as scratch prevention, but also adds a sporty touch to the door handle surroundings. It can be mounted along the dented form of the door and is pressure-bonded with powerful double-sided tape.

* Chemical-based products such as waxes and coating agents or solvents including gasoline and thinners can cause stains and deformation of the product. If the cover comes into contact with such chemicals or solvents, clean the product immediately.

* Please note that the product may detach or loosen if the car is cleaned under high-pressure or steam washing.

* The image is for illustrative purposes only. The shape may differ from the actual product.

* A set of 4 pieces of the same size for 1 vehicle (4 doors)

* Carbon-effect PVC

* The surface of the product may become cloudy when it is exposed to moisture such as rainwater for a long time. However, this is a characteristic of the material used (PVC) and is not abnormal. It will be restored when dry.

DOOR MIRROR COVER CHERRY RED LH

ST91054VR000 CHERRY RED

ST91054VR010 RH

With this stylish DOOR MIRROR COVER painted in cherry red, you can create a sporty appearance reminiscent of the NBR Challenge or SUPER GT racing cars. As this add-on is a genuine replacement part and the same shape as the original cover, no special work is required to install it on your car.

* This product is sold for the left and right-hand sides separately.

* The explanation of this product is for Japanese specification.

* The image shows how it looks when ST91054VR000 is fitted on Left-hand side.

TAIL GATE GARNISH COMBI

ST91042VR000 COMBI (3-colour)

This is a 3-color stripe "Combi" garnish in silver, black and cherry red, to be attached to the lower part of the tailgate.

This is made of a special, highly weather resistant resin called Hyboscal.

* The surface may become white or cloudy if exposed to moisture such as rainwater for an extended period of time. However, this is a characteristic of the material (Hyboscal=PVC) and is not abnormal. The color will return to normal when dry.

STI PERFORMANCE PARTS

Aero/Exterior

TAILGATE GARNISH (CHERRY RED)

ST91042VR010 CHERRY RED

This is a single-color garnish in cherry red, to be attached to the lower part of the tailgate.

By applying the tailgate garnish to the rear of the vehicle together with a front skirt lip (cherry red) and side door mirror covers (cherry red), you can achieve a cherry red accent throughout the exterior of the vehicle.

* The surface may become white or cloudy if exposed to moisture such as rainwater for an extended period of time. However, this is a characteristic of the material (Hyboscail=PVC) and is not abnormal. The color will return to normal when dry.

DOOR HANDLE PROTECTOR

ST91099ST080

This is a carbon-effect door-handle protector which protects the car from scratches and fingerprints when opening/closing doors. Designed for a grip-type door handle, this not only serves as scratch prevention, but also adds a sporty touch to the door handle surroundings. It can be mounted along the dented form of the door and is pressure-bonded with powerful double-sided tape.

* Chemical-based products such as waxes and coating agents or solvents including gasoline and thinners can cause stains and deformation of the product. If the cover comes into contact with such chemicals or solvents, clean the product immediately.

* Please note that the product may detach or loosen if the car is cleaned under high-pressure or steam washing.

* A set of 4 pieces of the same size for 1 vehicle (4 doors)

* Carbon-effect PVC

 Brake

**DRILLED DISC F**

ST26300VR000

The disc surface is drilled to keep the brake pad surface clean, ensuring stable braking force at all times. In addition, a spiral vane internal structure improves the heat capacity by about 4% compared to the standard disc installed in the vehicle and improves fade resistance.

- * Not compatible with the NEW WRX S4(VB) MT cars.
- * The price indicated is for one disc (two disc are required per vehicle).
- * Use this product in combination with the DRILLED DISC REAR (ST26700VV000).
- * To install this product, four (4) SUBARU genuine bolts (product number:901260025) are required.
- * This product is common to both left and right sides. The orientation of the drill holes when installed differs from left to right, but this does not affect the performance.
- * Use this product in combination with a standard pad.

**DRILLED DISC REAR**

ST26700VV000

This brake rotor was designed to further improve braking control and rotor cooling performance while reducing weight. The rotor disc surface is equipped with drilled cooling holes and has a spiral vane structure, which improves cooling performance at high temperatures by 7% compared to standard brake rotors. In addition, the rotor boasts better surface cleaning properties, more stable u-characteristics due to the degassing effect during the fading process, and improved control. A single front rotor is also approximately 300 g lighter, and a rear rotor is approximately 200 g lighter than the standard model, reducing the weight beneath the springs. The product is compatible with EyeSight.

- * Not compatible with NEW WRX S4(VB) MT cars.
- * This comes only one piece. (2 pieces are necessary per vehicle)
- * For vehicles with 17-inch brakes
- * When install this product in LEVORS(VN) and NEW WRX S4(VB), four (4) SUBARU genuine bolts (product number:901260024) are required.
- * This product can be used on both the left and right sides. The direction of the drill holes when installing this product vary between left and right, but this does not affect the performance.
- * This can be used together with the standard pads (though we recommend installing it as a set with the STI brake pads).

STI PERFORMANCE PARTS

Engine/Transmission

RADIATOR CAP

ST45137ST001

Opening value pressure changed from 108kPa(0.108MPa)to standard value 130kPa(0.13MPa). This radiator cap reduces the risk of overflow caused by the thermal expansion of coolant water even under severe conditions such as sports driving or circuit driving. Opening valve pressure unit changed from 'bar' to 'Mpa' and changed in design.

* When replacing this product, pay careful attention to leakage of water from the piping, and be sure to inspect the coolant water at the start of work.

OIL FILLER CAP

ST15257ZR010

This oil filler cap consists of a die-cast aluminum base that has been machined, and given a stylish resin cover.

Shape of the cap has been specially designed to allow for use even when wearing work gloves.

For times when the cap is difficult to remove, it contains special service holes under the resin cover that allow you to use the on-board wheel wrench to loosen the cap when it is too tight to do so by hand. The silver aluminum base with embossed black cap showing the cherry red STI logo adds "functional beauty" to the engine compartment.

* A gasket is not included. Please use the one attached to the filler cap you removed. If using a new gasket, be sure to use a genuine product for the corresponding model.

* If this product is installed on non-compatible models, there is the risk of deformation in the oil filler neck.

* The logo may not face the front.

PERFORMANCE OIL FILTER

ST15208ST010

This is an oil filter with enhanced performance thanks to an increased filtration area of 15% compared with a conventional product. With dedicated materials to improve its particle collection performance, this filter also captures fine particles such as carbon and reduces pressure loss by 10%. With the resulting reduced pump loss, this filter is compatible with high viscosity oil, providing stable performance not only on roads but also on the circuit track. It is painted cherry red and features the STI logo.

STI PERFORMANCE PARTS

Interior/Others

SHIFT KNOB (CVT)

SG117VC000

High quality kip-skin leather is used and an STI logo is embroidered in cherry red on the top of this gearshift knob. The sides are upholstered with dimpled kip skin for a sporty finish. The decorative part is in piano black to give a premium feel. This is a CVT gearshift knob to provide a moist feel when in use.

*This can only be installed in a car with the Lineartronic CVT.

*Genuine leather and Dimpled genuine leather

*Embroidered STI logo in cherry red

DOOR INNER PROTECTOR FOR IMPREZA/XV (GK/GT),LEVORG(VN),WRX S4(VB)

STSG19101490

The inner part of the door can become scratched or dirty when shoes or bags contact the area as passengers get in and out of the vehicle. In order to avoid this, this protector is recommended.

In addition to its protective qualities, this product can also enhance the interior atmosphere with its sporty look.

The quality of this protector is guaranteed as it uses the same material as the popular product "Door Handle Protector".

By utilizing a thicker PVC material, this product is more durable than sticker-type protectors and is difficult to come off due to a strong-adhesive sheet used on its sticky side.

* Set of 4 sheets (2 for front, 2 for rear) (for 1 car)

BATTERY HOLDER(SILVER)

ST82182ST010 SILVER

This unique battery holder has a design motif reminiscent of the flexible tower bar. In addition to securely holding the bulky battery, it also adds an attractive highlight to the engine compartment.

* This product can be installed in many SUBARU vehicles that use a D-type battery, such as the LEGACY, LEVORG, WRX, IMPREZA, FORESTER, EXIGA, and SUBARU BRZ. Example battery model number: 80D23R (Compatible with batteries with "D" as the third digit.)

* We recommend installation be carried out by your local SUBARU dealer.

PUSH ENGINE SWITCH

ST83031ST051

Push-button ignition starter switch for models with keyless entry and push-button starter switches. The cherry red button with the STI logo in the center gives the interior a sporty appearance. Cherry red button, with the STI logo in the center.

* For cars with keyless access and push-button start.
