2016.0 RANGE ROVER (LG), 100-00

GENERAL INFORMATION

DESCRIPTION AND OPERATION

BODY CONTROL MODULE (BCM)

CAUTION:

Diagnosis by substitution from a donor vehicle is **NOT** acceptable. Substitution of control modules does not guarantee confirmation of a fault, and may also cause additional faults in the vehicle being tested and/or the donor vehicle

NOTES:

- If the control module or a component is suspect and the vehicle remains under manufacturer warranty, refer to the warranty policy and procedures manual, or determine if any prior approval programme is in operation, prior to the installation of a new module/component.
- Generic scan tools may not read the codes listed, or may read only 5-digit codes. Match the 5 digits from the scan tool to the first 5 digits of the 7-digit code listed to identify the fault (the last 2 digits give extra information read by the manufacturer-approved diagnostic system)
- When performing voltage or resistance tests, always use a digital

multimeter that has the resolution ability to view 3 decimal places. For example, on the 2 volts range can measure 1mV or 2 K Ohm range can measure 1 Ohm. When testing resistance always take the resistance of the digital multimeter leads into account.

- Check and rectify basic faults before beginning diagnostic routines involving pinpoint tests
- Inspect connectors and modules for signs of water ingress, and pins for damage and/or corrosion
- If diagnostic trouble codes are recorded and, after performing the pinpoint tests, a fault is not present, an intermittent concern may be the cause. Always check for loose connections and corroded terminals
- Where an 'on demand self-test' is referred to, this can be accessed via the 'diagnostic trouble code monitor' tab on the manufacturers approved diagnostic system
- Check DDW for open campaigns. Refer to the corresponding bulletins and SSMs which may be valid for the specific customer complaint and carry out the recommendations as required

The table below lists all diagnostic trouble codes (DTCs) that could be logged in the Body Control Module (BCM), for additional diagnosis and testing information refer to the relevant diagnosis and testing section. For additional information, refer to: Communications Network (418-00 Module Communications Network, Diagnosis and Testing).

DTC	DESCRIPTION	POSSIBLE CAUSES	ACTI
B1008-11	Wiper Mode Switch - Circuit short to ground	▪ Wipers and washers control switch circuit short circuit to ground ▪ Wipers and washers control switch fault	▪ Refer to the e circuit diagra the wipers an control switch short circuit t Repair circuit clear the DTC ▪ If no wiring fa present, chec

			new switch as Clear the DT
B1008-15	Wiper Mode Switch - Circuit short to battery or open	▪ Wipers and washers control switch circuit short circuit to power, open circuit, high resistance ▪ Wipers and washers control switch fault	▪ Refer to the e circuit diagra the wipers an control switch short circuit t open circuit, resistance. Re required, clea and retest ▪ If no wiring fa present, chec new switch as Clear the DT
B1008-1C	Wiper Mode Switch - Circuit Voltage Out Of Range	▪ Wipers and washers control switch circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Wipers and washers control switch fault	▪ Refer to the e circuit diagra the wipers an control switch short circuit t short circuit t open circuit, resistance. Re required, clea and retest ▪ If no wiring fa present, chec new switch as Clear the DT
B1009-51	Ignition Authorization - Not programmed	▪ Instrument cluster power or ground circuit open circuit, high resistance ▪ Target security identification re-synchronisation error following programming ▪ High speed CAN bus (powertrain) circuit short circuit to ground, short circuit to power, open circuit, high resistance	**NOTE:** This DTC is to occur foll component replacemen applications prior to com ▪ Refer to the e circuit diagra the instrumer power and gr for open circu resistance

				▪ Re-synchroni reconfiguring instrument cl module ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the high spee (powertrain) c short circuit t short circuit t open circuit, resistance
	B1009-62	Ignition Authorization - Signal compare failure	▪ Body control module power or ground circuit open circuit, high resistance ▪ Instrument cluster power or ground circuit open circuit, high resistance ▪ High speed CAN bus (powertrain) circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Incorrect body control module installed ▪ Incorrect instrument cluster installed ▪ Target security identification re-synchronisation error following programming	**NOTE:** This DTC is to occur foll component replacemen applications prior to com ▪ Refer to the e circuit diagra the body con power and gr for open circu resistance ▪ Refer to the e circuit diagra the instrumen power and gr for open circu resistance ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the high spee (powertrain) c short circuit t short circuit t open circuit,

				resistance ▪ Confirm corre control modu ▪ Confirm corre cluster is insta ▪ Re-synchroniz reconfiguring instrument cl module
	B100D-51	Column Lock Authorization - Not programmed	▪ Electric steering column lock control module not programmed	▪ Clear the DT(If fault persist the electric st column lock c module using manufacturer diagnostic sy:
	B100D-61	Column Lock Authorization - Signal calculation failure	▪ Anti-lock brake system fault ▪ High speed CAN bus (powertrain) circuit short circuit to ground, short circuit to power, open circuit, high resistance	**NOTE:** Prior to clea DTC, carry c vehicle func reset applic using the manufacture approved d system ▪ Using the ma approved dia system, checl brake system module for re and refer to t DTC index ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the high spee (powertrain) c short circuit t short circuit t open circuit,

				resistance
	B100D-81	Column Lock Authorization - Invalid serial data received	▪ Encrypted data exchange between electric steering column lock control module and the body control module does not match ▪ High speed CAN bus (powertrain) circuit short circuit to ground, short circuit to power, open circuit, high resistance	**NOTES** ▪ This DTC likely to c following compone replacem applicatio prior to c ▪ Prior to c this DTC, the vehic functiona applicatio the manu approved diagnosti ▪ Using the ma approved dia system, re-co body control the latest lev ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the high spee (powertrain) c short circuit t short circuit t open circuit, resistance
	B100D-82	Column Lock Authorization - Alive / Sequence Counter Incorrect / Not Updated	▪ Anti-lock brake system fault ▪ High speed CAN bus (powertrain) circuit short circuit to ground, short circuit to power, open circuit, high resistance	

				NOTE: Prior to clea DTC, carry c vehicle func reset applic using the manufacture approved d system ▪ Using the ma approved dia system, checl brake system module for re and refer to t DTC index ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the high spee (powertrain) c short circuit t short circuit t open circuit, resistance
	B100D-84	Column Lock Authorization - Signal Below Allowable Range	▪ Anti-lock brake system fault ▪ High speed CAN bus (powertrain) circuit short circuit to ground, short circuit to power, open circuit, high resistance	**NOTE:** Prior to clea DTC, carry c vehicle func reset applic using the manufacture approved d system ▪ Using the ma approved dia system, checl brake system module for re

				and refer to t DTC index ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the high spee (powertrain) c short circuit t short circuit t open circuit, resistance
	B100D-85	Column Lock Authorization - Signal Above Allowable Range	▪ Anti-lock brake system fault ▪ High speed CAN bus (powertrain) circuit short circuit to ground, short circuit to power, open circuit, high resistance	**NOTE:** Prior to clea DTC, carry o vehicle func reset applic using the manufacture approved d system ▪ Using the ma approved dia system, checl brake system module for re and refer to t DTC index ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the high spee (powertrain) c short circuit t short circuit t open circuit, resistance
	B100D-86	Column Lock Authorization - Signal	▪ Anti-lock brake system fault	

		Invalid	▪ High speed CAN bus (powertrain) circuit short circuit to ground, short circuit to power, open circuit, high resistance	**NOTE:** Prior to clea DTC, carry c vehicle func reset applic using the manufacture approved d system ▪ Using the ma approved dia system, checl brake system module for re and refer to t DTC index ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the high spee (powertrain) c short circuit t short circuit t open circuit, resistance
	B100D-87	Column Lock Authorization - Missing message	▪ High speed CAN bus (powertrain) circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Electric steering column lock fault ▪ Instrument cluster fault	▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the high spee (powertrain) c short circuit t short circuit t open circuit, resistance ▪ Using the ma approved dia system, checl steering colu control modu DTCs and ref

			relevant DTC ▪ Using the ma approved dia system, checl instrument cl related DTCs the relevant [
B1024-87	Start Control Unit - Missing message	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Immobilizer antenna unit power or ground circuit open circuit, high resistance ▪ Immobilizer antenna unit failure	▪ Refer to the e circuit diagra the immobiliz unit LIN bus c short circuit t short circuit t open circuit, resistance ▪ Refer to the e circuit diagra the immobiliz unit power ar circuits for op high resistanc ▪ Using the ma approved dia system, clear retest. If the f install a new i antenna unit
B1026-11	Steering Column Lock - Circuit short to ground	▪ Electric steering column lock control module supply circuit short circuit to ground	▪ Refer to the e circuit diagra the electric st column lock c module supp short circuit t
B1026-12	Steering Column Lock - Circuit short to battery	▪ Electric steering column lock control module supply circuit short circuit to power	▪ Refer to the e circuit diagra the electric st column lock c module supp short circuit t
B1026-15	Steering Column Lock - Circuit short to battery or open	▪ Electric steering column lock control module supply circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the electric st column lock c module supp

				short circuit t open circuit, resistance
	B102B-67	Passive Key - Signal incorrect after event	▪ Encrypted data exchange between keyless vehicle module and body control module does not match ▪ Keyless vehicle module power or ground circuit open circuit, high resistance ▪ Keyless vehicle system fault ▪ Medium speed CAN bus (body) circuit short circuit to ground, short circuit to power, open circuit, high resistance	**NOTE:** This DTC is to occur foll component replacemen applications prior to com ▪ Re-synchronis reconfiguring control modu module. Re-s by reconfigur keyless vehicl new module ▪ Refer to the e circuit diagra the keyless ve power and gr for open circu resistance ▪ Using the ma approved dia system, check vehicle modu DTCs and ref relevant DTC ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the medium s bus (body) ci circuit to grou circuit to pow circuit, high r
	B103C-09	Left Headlamp Control - Component failures	▪ Left headlamp failure	▪ Using the ma approved dia system, clear

				retest. If the install a new
	B103C-12	Left Headlamp Control - Circuit short to battery	▪ Left headlamp power supply circuit short circuit to power	▪ Refer to the circuit diagra the left headl supply circuit circuit to pow
	B103C-14	Left Headlamp Control - Circuit short to ground or open	▪ Left headlamp power supply circuit short circuit to ground, open circuit, high resistance	▪ Refer to the circuit diagra the left headl supply circuit circuit to grou circuit, high r
	B103C-1C	Left Headlamp Control - Circuit Voltage Out Of Range	▪ Left headlamp power supply circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Battery/charging system fault ▪ Left headlamp failure	▪ Refer to the circuit diagra the left headl supply circuit circuit to grou circuit to pow circuit, high r ▪ Refer to the section of the manual and t battery and c system ▪ Clear the DT If the fault pe new left head
	B103C-49	Left Headlamp Control - Internal electronic failure	▪ Left headlamp failure	▪ Using the ma approved dia system, clear retest. If the install a new
	B103C-86	Left Headlamp Control - Signal invalid	▪ Left headlamp power or ground circuit open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the circuit diagra the left headl and ground c open circuit, resistance ▪ Refer to the circuit diagra the left headl

				circuit for sho ground, short power, open resistance
	B103C-87	Left Headlamp Control - Missing message	■ Left headlamp power or ground circuit open circuit, high resistance ■ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	■ Refer to the e circuit diagra the left headl and ground c open circuit, resistance ■ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance
	B103C-96	Left Headlamp Control - Component internal failure	■ Left headlamp failure	■ Using the ma approved dia system, clear retest. If the f install a new l
	B103C-98	Left Headlamp Control - Component Or System Over Temperature	■ Left headlamp over temperature ■ Left headlamp failure	■ Clear the DTC while the veh normal ambie temperature the fault pers new left head
	B103D-09	Right Headlamp Control - Component failures	■ Right headlamp failure	■ Using the ma approved dia system, clear retest. If the f install a new r headlamp
	B103D-12	Right Headlamp Control - Circuit short to battery	■ Right headlamp power supply circuit short circuit to power	■ Refer to the e circuit diagra the right head supply circuit circuit to pow
	B103D-14	Right Headlamp Control - Circuit short	■ Right headlamp power supply circuit short circuit to ground, open circuit, high resistance	■ Refer to the e circuit diagra

	to ground or open		the right hea supply circuit circuit to gro circuit, high r
B103D-1C	Right Headlamp Control - Circuit Voltage Out Of Range	▪ Right headlamp power supply circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Battery/charging system fault ▪ Right headlamp failure	▪ Refer to the e circuit diagra the right hea supply circuit circuit to gro circuit to pow circuit, high r ▪ Refer to the r section of the manual and t battery and c system ▪ Clear the DT If the fault pe new right hea
B103D-49	Right Headlamp Control - Internal electronic failure	▪ Right headlamp failure	▪ Using the ma approved dia system, clear retest. If the install a new headlamp
B103D-86	Right Headlamp Control - Signal invalid	▪ Right headlamp power or ground circuit open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the right hea and ground c open circuit, resistance ▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance
B103D-87	Right Headlamp Control - Missing message	▪ Right headlamp power or ground circuit open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the right hea and ground c open circuit, resistance

			▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance
B103D-96	Right Headlamp Control - Component internal failure	▪ Right headlamp failure	▪ Using the ma approved dia system, clear retest. If the install a new headlamp
B103D-98	Right Headlamp Control - Component Or System Over Temperature	▪ Right headlamp over temperature ▪ Right headlamp failure	▪ Clear the DT while the veh normal ambie temperature the fault pers new right hea
B1041-54	Levelling Control - Missing Calibration	▪ Headlamp levelling calibration routine has not been run successfully	▪ Check for hea related DTCs the relevant D Ensure that a faults have be before attem the headlamp calibration ro ▪ Using the ma approved dia system, run th routine - Cali Levelling Sen
B1047-11	Rear Fog Lamp Control Switch - Circuit short to ground	▪ Rear fog lamp switch circuit short circuit to ground ▪ Switch fault	▪ Refer to the e circuit diagra the rear fog l circuit for sho ground. Repa required, clea and retest ▪ If no wiring fa present, chec new switch as Clear the DT

	B1047-15	Rear Fog Lamp Control Switch - Circuit short to battery or open	▪ Rear fog lamp switch circuit short circuit to power, open circuit, high resistance ▪ Switch fault	▪ Refer to the e circuit diagra the rear fog l circuit for sho power, open resistance. Re required, clea and retest ▪ If no wiring fa present, chec new switch as Clear the DT(
	B1047-1C	Rear Fog Lamp Control Switch - Circuit Voltage Out Of Range	▪ Rear fog lamp switch circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Switch fault	▪ Refer to the e circuit diagra the rear fog l circuit for sho ground, short power, open resistance. Re required, clea and retest ▪ If no wiring fa present, chec new switch as Clear the DT(
	B1051-11	Front Washer Switch - Circuit short to ground	▪ Wipers and washers control switch circuit short circuit to ground ▪ Wipers and washers control switch fault	▪ Refer to the e circuit diagra the wipers an control switch short circuit t Repair circuit clear the DTC ▪ If no wiring fa present, chec new switch as Clear the DT(
	B1051-15	Front Washer Switch - Circuit short to battery or open	▪ Wipers and washers control switch circuit short circuit to power, open circuit, high resistance ▪ Wipers and washers control switch fault	▪ Refer to the e circuit diagra the wipers an control switch short circuit t open circuit, resistance. Re required, clea and retest

			▪ If no wiring fa present, chec new switch as Clear the DTC
B1051-1C	Front Washer Switch - Circuit voltage out of range	▪ Wipers and washers control switch circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Wipers and washers control switch fault	▪ Refer to the e circuit diagra the wipers an control switch short circuit t short circuit t open circuit, resistance. Re required, clea and retest ▪ If no wiring fa present, chec new switch as Clear the DTC
B1087-88	LIN Bus "A" - Bus Off	▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the headlamp circuit for sho ground, short power, open resistance
B108B-11	Start Button Circuit "A" - Circuit short to ground	▪ Stop/start switch circuit 1 short circuit to ground	▪ Refer to the e circuit diagra the stop/start 1 for short cir ground
B108B-12	Start Button Circuit "A" - Circuit short to battery	▪ Stop/start switch circuit 1 short circuit to power	▪ Refer to the e circuit diagra the stop/start 1 for short cir
B108B-13	Start Button Circuit "A" - Circuit open	▪ Stop/start switch circuit 1 open circuit, high resistance	▪ Refer to the e circuit diagra the stop/start 1 for open cir resistance
B108B-23	Start Button Circuit "A" - Signal stuck low	▪ Stop/start switch circuit 1 circuit short circuit to ground	▪ Refer to the e circuit diagra

			▪ Stop/start switch stuck active	the stop/start 1 circuit for s ground ▪ Test the oper stop/start sw
	B108B-56	Start Button Circuit "A" - Invalid/Incomplete configuration	▪ Stop/start switch mismatch with car configuration file	▪ Clear the DT If fault persis manufacturer diagnostic sy reconfigure t control modu latest level sc
	B108C-11	Start Button Circuit "B" - Circuit short to ground	▪ Stop/start switch circuit 2 short circuit to ground	▪ Refer to the circuit diagra the stop/start 2 for short ci ground
	B108C-12	Start Button Circuit "B" - Circuit short to battery	▪ Stop/start switch circuit 2 short circuit to power	▪ Refer to the circuit diagra the stop/start 2 for short ci
	B108C-13	Start Button Circuit "B" - Circuit open	▪ Stop/start switch circuit 2 open circuit, high resistance	▪ Refer to the circuit diagra the stop/start 2 for open ci resistance
	B108C-23	Start Button Circuit "B" - Signal stuck low	▪ Stop/start switch circuit 2 circuit short circuit to ground ▪ Stop/start switch stuck active	▪ Refer to the circuit diagra the stop/start 2 circuit for s ground ▪ Test the oper stop/start sw
	B108C-56	Start Button Circuit "B" - Invalid/Incomplete configuration	▪ Stop/start switch mismatch with car configuration file	▪ Clear the DT If fault persis manufacturer diagnostic sy reconfigure t control modu latest level sc

B1095-12	Wiper On/Off Relay - Circuit short to battery	▪ Windshield wiper motor on/off relay circuit short circuit to power	▪ Refer to the e circuit diagra the windshiel motor on/off for short circu
B1095-14	Wiper On/Off Relay - Circuit short to ground or open	▪ Windshield wiper motor on/off relay circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the windshiel motor on/off for short circu open circuit, resistance
B1096-12	Wiper High/Low Relay - Circuit short to battery	▪ Windshield wiper motor fast/slow relay circuit short circuit to power	▪ Refer to the e circuit diagra the windshiel motor fast/sl circuit for sho power
B1096-14	Wiper High/Low Relay - Circuit short to ground or open	▪ Windshield wiper motor fast/slow relay circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the windshiel motor fast/sl circuit short c ground, open resistance
B1097-12	Heated Windshield Relay - Circuit short to battery	▪ Heated windshield relay circuit short circuit to power	▪ Refer to the e circuit diagra the heated w relay circuit fo to power
B1097-14	Heated Windshield Relay - Circuit short to ground or open	▪ Heated windshield relay circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the heated w relay circuit s ground, open resistance
B109E-51	Remote Keyless Entry - Not programmed	▪ Keyless vehicle module is not configured correctly	▪ Using the ma approved dia system, recor keyless vehicl

				with the lates software
	B10A2-31	Crash Input - No signal	■ Restraints system fault ■ Crash signal circuit short circuit to ground, short circuit to power, open circuit, high resistance	■ Using the ma approved dia system, checl restraints cor for related D to the relevar ■ Refer to the e circuit diagra the crash sigr short circuit t short circuit t open circuit, resistance
	B10A2-38	Crash Input - Signal frequency incorrect	■ Restraints system fault ■ Crash signal circuit short circuit to ground, short circuit to power, open circuit, high resistance	■ Using the ma approved dia system, checl restraints cor for related D to the relevar ■ Refer to the e circuit diagra the crash sigr short circuit t short circuit t open circuit, resistance
	B10A6-00	Main Light Switch - No sub type information	■ Steering column left multifunction switch internal failure	**NOTE:** Steering col multifunctio retaining scr tightening t 0.7 Nm ■ Check if the s column left m switch retaini tightened acc specifications Inappropriate screws might steering whe

				failure ▪ Using the ma approved dia system, clear retest. If the install a new column left m switch
	B10A6-11	Main Light Switch - Circuit short to ground	▪ Lighting control switch circuit short circuit to ground ▪ Lighting control switch failure	▪ Refer to the circuit diagra the lighting c circuit for sho ground ▪ Using the ma approved dia system, clear retest. If the install a new control switch
	B10A6-15	Main Light Switch - Circuit short to battery or open	▪ Lighting control switch circuit short circuit to power, open circuit, high resistance ▪ Lighting control switch failure	▪ Refer to the circuit diagra the lighting c circuit for sho power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new control switch
	B10AB-51	Remote Keyless Entry Synchronization - Not programmed	▪ Keyless vehicle module is not configured correctly	▪ Using the ma approved dia system, recor keyless vehicl with the lates software
	B10AD-87	Rain Sensor - Missing message	▪ Rain/light sensor incorrectly installed ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Rain/light sensor power or ground circuit open circuit, high resistance	▪ Check the se installation of sensor ▪ Refer to the circuit diagra the rain senso

			▪ Rain/light sensor failure	circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the rain/light and ground c open circuit, resistance ▪ Using the ma approved dia system, clear retest. If the f install a new r sensor
	B10AD-96	Rain Sensor - Component internal failure	▪ Rain/light sensor failure	▪ Using the ma approved dia system, clear retest. If the f install a new r sensor
	B10AE-11	Headlamp Leveling Motor - Circuit Short To Ground	▪ Headlamp leveling motor circuit short circuit to ground	▪ Refer to the e circuit diagra the headlamp motor circuit circuit to grou
	B10AE-12	Headlamp Leveling Motor - Circuit Short To Battery	▪ Headlamp leveling motor circuit short circuit to power	▪ Refer to the e circuit diagra the headlamp motor circuit circuit to pow
	B10C0-53	Fuel Pump Power Supply - Deactivated	▪ Fuel pump power supply deactivated	

				NOTE: This DTC in that the fue has been di diagnostical protect the fuel pump fr running follo replacemen fuel tank or replacemen body contro module/gat module asse ▪ Ensure there fuel in the fue submerge the pump (minim litres). Using manufacturer diagnostic sy reconfigure t control modu latest level sc
	B10E5-11	PCM Wake-Up Signal - Circuit short to ground	▪ Powertrain control module wake up circuit short circuit to ground	▪ Refer to the e circuit diagra the powertra module wake short circuit t
	B10E5-15	PCM Wake-Up Signal - Circuit short to battery or open	▪ Powertrain control module wake up circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the powertra module wake short circuit t open circuit, resistance
	B10E7-11	Ignition On Relay - Circuit short to ground	▪ Power supply feed to engine junction box Ignition ON relay circuit short circuit to ground	▪ Refer to the e circuit diagra the power su engine juncti Ignition ON r short circuit t

B10E7-15	Ignition On Relay - Circuit short to battery or open	▪ Power supply feed to engine junction box Ignition ON relay circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the power su engine juncti Ignition ON r short circuit t open circuit, resistance
B10EA-12	Positive Temperature Coefficient Heater - Circuit short to battery	▪ Electric booster heater circuit short circuit to power	▪ Refer to the e circuit diagra the electric b circuit for sho power
B10EA-14	Positive Temperature Coefficient Heater - Circuit short to ground or open	▪ Electric booster heater circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the electric b circuit for sho ground, oper resistance
B10F2-4B	Sunroof Control - Over temperature	▪ Roof opening panel operation protection measures have been activated ▪ Excessive continuous operation of the roof opening panel	**NOTE:** This DTC m when the ro opening pa been opera repeatedly, the roof ope panel moto temporarily ▪ Clear the DT the roof oper open/close s opening pane operation. Re necessary. Cl and retest ▪ Test the oper roof opening open/close s new roof ope open/close s required

B10F2-74	Sunroof Control - Actuator slipping	▪ Roof opening panel control module failure ▪ Roof opening panel harness fault ▪ Roof opening panel open/close switch stuck active	▪ Clear the DT(the roof oper open/close sv opening pane operation. Re necessary. Cl and retest ▪ Refer to the e circuit diagra the roof oper control modu for short circu short circuit t open circuit, resistance. Cl harness for si damage. Rep required ▪ Test the oper roof opening open/close sv new roof ope open/close sv required ▪ Using the ma approved dia system, clear retest. If the t install a new r panel control
B10F2-93	Sunroof Control - No operation	▪ Roof opening panel harness fault ▪ Roof opening panel control module failure	▪ Refer to the e circuit diagra the roof oper control modu for short circu short circuit t open circuit, resistance. Cl harness for si damage. Rep required ▪ Using the ma approved dia system, perfo Sunroof Calib (0X2039). Cle and retest. If persists, insta opening pane

			module
B10F2-9A	Sunroof Control - Component or system operating conditions	▪ Roof opening panel operation protection measures have been activated ▪ Excessive repeated operation of the roof opening panel switch ▪ Roof opening panel open/close switch stuck active	**NOTE:** This DTC m when the ro opening pa been opera repeatedly, the roof op panel moto temporarily ▪ Clear the DT the operatio and roof ope correct opera as necessary. DTCs and ret ▪ Refer to the circuit diagra the roof ope control modu for short circu short circuit t open circuit, resistance. Cl harness for si damage. Rep required ▪ Test the oper roof opening open/close s new roof ope open/close s necessary
B10F3-11	Left Front Position Light - Circuit short to ground	▪ Front left side lamp circuit short circuit to ground ▪ Lamp fault	▪ Refer to the circuit diagra the front left circuit for sho ground. Repa required, clea and retest ▪ If fault persis install a new lamp as requi

B10F3-12	Left Front Position Light - Circuit short to battery	▪ Front left side lamp circuit short circuit to power ▪ Lamp fault	▪ Refer to the e circuit diagra the front left circuit for sho power. Repai required, clea and retest ▪ If fault persist install a new lamp as requi
B10F3-15	Left Front Position Light - Circuit short to battery or open	▪ Front left side lamp circuit short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the front left circuit for sho power, open resistance. Re required, clea and retest ▪ If fault persist install a new lamp as requi
B10F3-84	Left Front Position Light - Signal Below Allowable Range	▪ Front left side lamp circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the front left circuit for sho ground, short power, open resistance. Re required, clea and retest ▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ If fault persist install a new lamp as requi
B10F3-85	Left Front Position Light - Signal Above Allowable Range	▪ Front left side lamp circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to	▪ Refer to the e circuit diagra the front left circuit for sho

			ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	ground, shor power, open resistance. Re required, clea and retest ▪ Refer to the e circuit diagra the left headl circuit for sho ground, shor power, open resistance ▪ If fault persis install a new lamp as requi
	B10F3-86	Left Front Position Light - Signal Invalid	▪ Front left side lamp circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the front left circuit for sho ground, shor power, open resistance. Re required, clea and retest ▪ Refer to the e circuit diagra the left headl circuit for sho ground, shor power, open resistance ▪ If fault persis install a new lamp as requi
	B10F4-11	Right Front Position Light - Circuit short to ground	▪ Front right side lamp circuit short circuit to ground ▪ Lamp fault	▪ Refer to the e circuit diagra the front righ circuit for sho ground. Repa required, clea and retest ▪ If fault persis install a new side lamp as
	B10F4-	Right Front Position	▪ Front right side lamp circuit short circuit to	▪ Refer to the e

12	Light - Circuit short to battery	power ▪ Lamp fault	circuit diagra the front righ circuit for sho power. Repai required, clea and retest ▪ If fault persis install a new side lamp as
B10F4-15	Right Front Position Light - Circuit short to battery or open	▪ Front right side lamp circuit short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the front righ circuit for sho power, open resistance. Re required, clea and retest ▪ If fault persis install a new side lamp as
B10F4-84	Right Front Position Light - Signal Below Allowable Range	▪ Front right side lamp circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the front righ circuit for sho ground, shor power, open resistance. Re required, clea and retest ▪ Refer to the e circuit diagra the right hea circuit for sho ground, shor power, open resistance ▪ If fault persis install a new side lamp as
B10F4-85	Right Front Position Light - Signal Above Allowable Range	▪ Front right side lamp circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the front righ circuit for sho ground, shor power, open

			▪ Lamp fault	resistance. Re required, clea and retest ▪ Refer to the e circuit diagra the right hea circuit for sho ground, shor power, open resistance ▪ If fault persis install a new side lamp as
	B10F4-86	Right Front Position Light - Signal Invalid	▪ Front right side lamp circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the front righ circuit for sho ground, shor power, open resistance. Re required, clea and retest ▪ Refer to the e circuit diagra the right hea circuit for sho ground, shor power, open resistance ▪ If fault persis install a new side lamp as
	B10F5-11	Left Rear Position Light - Circuit short to ground	▪ Left tail lamp circuit short circuit to ground ▪ Lamp fault	▪ Refer to the e circuit diagra the left tail la short circuit t Repair circuit clear the DTC ▪ If fault persis install a new as required
	B10F5-15	Left Rear Position Light - Circuit short to battery or open	▪ Left tail lamp circuit short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the left tail la short circuit t

				open circuit, resistance. Re required, clea and retest ▪ If fault persis install a new as required
	B10F6-11	Right Rear Position Light - Circuit short to ground	▪ Right tail lamp circuit short circuit to ground ▪ Lamp fault	▪ Refer to the circuit diagra the right tail for short circu Repair circuit clear the DTC ▪ If fault persis install a new as required
	B10F6-15	Right Rear Position Light - Circuit short to battery or open	▪ Right tail lamp circuit short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the circuit diagra the right tail for short circu open circuit, resistance. Re required, clea and retest ▪ If fault persis install a new as required
	B10F8-12	Accessory Socket 'A' Relay - Circuit short to battery	▪ 12 volt accessory socket relay circuit short circuit to power ▪ 12 volt accessory socket relay failure ▪ Incorrect 12 volt accessory socket relay installed ▪ Body control module failure	▪ Refer to the circuit diagra the 12 volt ac socket relay c short circuit t Repair circuit clear the DTC ▪ If fault persis install a new accessory soc ▪ Using the ma approved dia system, clear retest. If the install a new module/gate assembly

B10F8-14	Accessory Socket 'A' Relay - Circuit short to ground or open	▪ 12 volt accessory socket relay circuit short circuit to ground, open circuit, high resistance ▪ 12 volt accessory socket relay failure ▪ Incorrect 12 volt accessory socket relay installed ▪ Body control module failure	▪ Refer to the e circuit diagra the 12 volt ac socket relay c short circuit t open circuit, resistance. Re required, clea and retest ▪ If fault persist install a new accessory soc ▪ Using the ma approved dia system, clear retest. If the f install a new I module/gate assembly
B10F9-12	Accessory Socket 'B' Relay - Circuit short to battery	▪ Cigar lighter relay circuit short circuit to power ▪ Cigar lighter relay failure ▪ Incorrect cigar lighter relay installed ▪ Body control module failure	▪ Refer to the e circuit diagra the cigar ligh circuit for sho power. Repai required, clea and retest ▪ If fault persist install a new c relay ▪ Using the ma approved dia system, clear retest. If the f install a new I module/gate assembly
B10F9-14	Accessory Socket 'B' Relay - Circuit short to ground or open	▪ Cigar lighter relay circuit short circuit to ground, open circuit, high resistance ▪ Cigar lighter relay failure ▪ Incorrect cigar lighter relay installed ▪ Body control module failure	▪ Refer to the e circuit diagra the cigar ligh circuit for sho ground, open resistance. Re required, clea and retest ▪ If fault persist install a new c

				relay ▪ Using the ma approved dia system, clear retest. If the install a new module/gate assembly
	B1101-11	Comfort Relay - Circuit short to ground	▪ Comfort relay circuit short circuit to ground	▪ Refer to the circuit diagra the comfort r short circuit t
	B1101-15	Comfort Relay - Circuit short to battery or open	▪ Comfort relay circuit short circuit to power, open circuit, high resistance	▪ Refer to the circuit diagra the comfort r short circuit t open circuit, resistance
	B1102-11	Trailer Stop Lamp - Circuit short to ground	▪ Trailer stop lamp circuit short circuit to ground	▪ Refer to the circuit diagra the trailer sto for short circu
	B1102-12	Trailer Stop Lamp - Circuit short to battery	▪ Trailer stop lamp circuit short circuit to power	▪ Refer to the circuit diagra the trailer sto for short circu
	B1112-11	Park Aid Ignition - Circuit short to ground	▪ Parking aid control module supply circuit short circuit to ground	▪ Refer to the circuit diagra the parking a module supp short circuit t
	B1112-15	Park Aid Ignition - Circuit short to battery or open	▪ Parking aid control module supply circuit short circuit to power, open circuit, high resistance	▪ Refer to the circuit diagra the parking a module supp short circuit t open circuit, resistance
	B1115-	High Mounted Stop	▪ High mounted stop lamp circuit short circuit to	▪ Refer to the

11	Lamp control - Circuit short to ground	ground	circuit diagra the high mou lamp circuit f to ground
B1115-12	High Mounted Stop Lamp control - Circuit short to battery	▪ High mounted stop lamp circuit short circuit to power	▪ Refer to the e circuit diagra the high mou lamp circuit f to power
B1115-15	High Mounted Stop Lamp control - Circuit short to battery or open	▪ High mounted stop lamp circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the high mou lamp circuit f to power, ope high resistanc
B111A-11	Number Plate Lamps - Circuit short to ground	▪ License plate lamp circuit short circuit to ground	▪ Refer to the e circuit diagra the license pl circuit for sho ground
B111A-12	Number Plate Lamps - Circuit short to battery	▪ License plate lamp circuit short circuit to power	▪ Refer to the e circuit diagra the license pl circuit for sho power
B111A-15	Number Plate Lamps - Circuit short to battery or open	▪ License plate lamp circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the license pl circuit for sho power, open resistance
B111E-11	Boot/Trunk Lamps - Circuit short to ground	▪ Luggage compartment lamp power supply circuit short circuit to ground	▪ Refer to the e circuit diagra the luggage c lamp power s for short circu Repair circuit clear the DTC
B111E-	Boot/Trunk Lamps -		▪ Refer to the e

	15	Circuit short to battery or open	**NOTE:** Circuit reference - O_TRUNK_LIGHT ▪ Luggage compartment lamp power supply circuit short circuit to power, open circuit, high resistance	circuit diagra the luggage lamp power s for short circu open circuit, resistance. Re required, clea and retest
	B112B-87	Steering Wheel Module - Missing message	▪ Steering wheel harness failure ▪ Steering column left multifunction switch failure ▪ Steering column right multifunction switch failure ▪ Clockspring power or ground circuit open circuit, high resistance ▪ Steering wheel heater control module power or ground circuit open circuit, high resistance ▪ Steering wheel right switchpack power or ground circuit open circuit, high resistance ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Check steerir harness for co damage, poo backed out p circuit as requ the DTCs and ▪ Using the ma approved dia system, clear retest. If the f install a new s column left m switch ▪ Using the ma approved dia system, clear retest. If the f install a new s column right switch ▪ Refer to the e circuit diagra the clockspri ground circui circuit, high r ▪ Refer to the e circuit diagra the steering w control modu ground circui circuit, high r ▪ Refer to the e circuit diagra the steering w switchpack p ground circui circuit, high r ▪ Refer to the e circuit diagra

				the clocksprir circuit(s) for s ground, shor power, open resistance
	B112C-87	Interior Motion Sensor - Missing message	▪ Volumetric sensor power or ground circuit open circuit, high resistance ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the volumetri power and gr for open circu resistance ▪ Refer to the e circuit diagra the interior m LIN bus circui circuit to grou circuit to pow circuit, high r
	B112C-96	Interior Motion Sensor - Component internal failure	▪ Volumetric sensor power or ground circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Volumetric sensor failure	▪ Refer to the e circuit diagra the volumetri power and gr for short circu short circuit t open circuit, resistance ▪ Refer to the e circuit diagra the interior m LIN bus circui circuit to grou circuit to pow circuit, high r ▪ Using the ma approved dia system, clear retest. If the f install a new v sensor
	B113C-11	Hazard Switch Illumination - Circuit short to ground	▪ Hazard switch illumination circuit short circuit to ground	▪ Refer to the e circuit diagra the hazard sw illumination c circuit to grou

B113C-15	Hazard Switch Illumination - Circuit short to battery or open	▪ Hazard switch illumination circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the hazard sw illumination c circuit to pow circuit, high r
B1140-11	Engine Crank Authorization - Circuit short to ground	▪ Engine crank request signal circuit short circuit to ground ▪ Powertrain control module failure	▪ Refer to the e circuit diagra the engine cr signal circuit circuit to grou ▪ Using the ma approved dia system, checl powertrain co for related D to the relevar
B1140-15	Engine Crank Authorization - Circuit short to battery or open	▪ Engine crank request signal circuit short circuit to power, open circuit, high resistance ▪ Powertrain control module failure	▪ Refer to the e circuit diagra the engine cr signal circuit circuit to pow circuit, high r ▪ Using the ma approved dia system, checl powertrain co for related D to the relevar
B1144-12	Heated Steering Wheel Supply - Circuit short to battery	▪ Heated steering wheel supply circuit short circuit to ground	▪ Refer to the e circuit diagra the heated st supply circuit circuit to grou
B1144-14	Heated Steering Wheel Supply - Circuit short to ground or open	▪ Heated steering wheel supply circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the heated st supply circuit circuit to pow circuit, high r
B1146-11	Passive Sounder Supply - Circuit short	▪ Passive sounder circuit short circuit to ground	▪ Refer to the e circuit diagra

	to ground		the passive s for short circu
B1146-15	Passive Sounder Supply - Circuit short to battery or open	▪ Passive sounder circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the passive s for short circu open circuit, resistance
B11A2-11	Master Exterior Light Switch - Circuit short to ground	▪ Master light switch circuit short circuit to ground ▪ Switch fault	▪ Refer to the e circuit diagra the master lig circuit for sho ground. Repa required, clea and retest ▪ If no wiring fa present, chec new switch as Clear the DTC
B11A2-15	Master Exterior Light Switch - Circuit short to battery or open	▪ Master light switch circuit short circuit to power, open circuit, high resistance ▪ Switch fault	▪ Refer to the e circuit diagra the master lig circuit for sho power, open resistance. Re required, clea and retest ▪ If no wiring fa present, chec new switch as Clear the DTC
B11DC-1C	Rear Wiper Mode Switch - Circuit voltage out of range	▪ Steering column right multifunction switch failure	**NOTE:** Wipers and control swit retaining scr tightening t 0.7 Nm ▪ Check if the v washers cont retaining scre

				tightened ac specifications Inappropriate screws might steering whe failure ▪ Using the ma approved dia system, clear retest. If the install a new washers cont
	B1216-23	Boot/Trunk Motor Close Sensor - Signal stuck low	▪ Tailgate soft close position switch circuit short circuit to ground ▪ Tailgate soft close position switch stuck active	▪ Refer to the circuit diagra the tailgate s position swit short circuit t ▪ Test the oper tailgate soft switch
	B1219-11	Interior Boot/Trunk Release Switch - Circuit short to ground	▪ Interior tailgate open switch circuit short circuit to ground ▪ Switch fault	▪ Refer to the circuit diagra the interior ta switch circuit circuit to grou circuit as requ the DTCs and ▪ If no wiring fa present, chec new switch as Clear the DT
	B1219-15	Interior Boot/Trunk Release Switch - Circuit short to battery or open	▪ Interior tailgate open switch circuit short circuit to power, open circuit, high resistance ▪ Switch fault	▪ Refer to the circuit diagra the interior ta switch circuit circuit to pow circuit, high r Repair circuit clear the DTC ▪ If no wiring fa present, chec new switch as Clear the DT

	B123A-04	Left Front Turn Indicator - System internal failures	▪ Left headlamp failure	▪ Using the ma approved dia system, clear retest. If the install a new
	B123A-11	Left Front Turn Indicator - Circuit short to ground	▪ Front left turn signal indicator circuit short circuit to ground	▪ Refer to the circuit diagra the front left indicator circ circuit to gro
	B123A-15	Left Front Turn Indicator - Circuit short to battery or open	▪ Front left turn signal indicator circuit short circuit to power, open circuit, high resistance	▪ Refer to the circuit diagra the front left indicator circ circuit to pow circuit, high r
	B123A-23	Left Front Turn Indicator - Signal stuck low	**NOTE:** Circuit reference - O_DIRECTION_INDICATOR_FRONT_LEFT ▪ Front left turn signal indicator circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the circuit diagra the front left indicator circ circuit to gro circuit to pow circuit, high r
	B123A-24	Left Front Turn Indicator - Signal stuck high	▪ Front left turn signal indicator circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the circuit diagra the front left indicator circ circuit to gro circuit to pow circuit, high r
	B123A-86	Left Front Turn Indicator - Signal invalid	▪ Left headlamp power or ground circuit open circuit, high resistance ▪ Front left turn signal indicator circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the circuit diagra the left headl and ground c open circuit, resistance ▪ Refer to the circuit diagra the front left

			indicator circ circuit to grou circuit to pow circuit, high r ▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance
B123B-04	Right Front Turn Indicator - System internal failures	▪ Right headlamp failure	▪ Using the ma approved dia system, clear retest. If the f install a new r headlamp
B123B-11	Right Front Turn Indicator - Circuit short to ground	▪ Front right turn signal indicator circuit short circuit to ground	▪ Refer to the e circuit diagra the front righ indicator circu circuit to grou
B123B-15	Right Front Turn Indicator - Circuit short to battery or open	▪ Front right turn signal indicator circuit short circuit to power	▪ Refer to the e circuit diagra the front righ indicator circu circuit to pow
B123B-23	Right Front Turn Indicator - Signal stuck low	▪ Front right turn signal indicator circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the front righ indicator circu circuit to grou circuit to pow circuit, high r
B123B-24	Right Front Turn Indicator - Signal stuck high	▪ Front right turn signal indicator circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the front righ indicator circu circuit to grou circuit to pow circuit, high r

	B123B-86	Right Front Turn Indicator - Signal invalid	▪ Right headlamp power or ground circuit open circuit, high resistance ▪ Front right turn signal indicator circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the right hea and ground c open circuit, resistance ▪ Refer to the e circuit diagra the front righ indicator circu circuit to grou circuit to pow circuit, high r ▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance
	B1247-11	Left Rear Turn Indicator - Circuit short to ground	▪ Rear left turn signal indicator circuit short circuit to ground	▪ Refer to the e circuit diagra the rear left t indicator circu circuit to grou
	B1247-15	Left Rear Turn Indicator - Circuit short to battery or open	▪ Rear left turn signal indicator circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the rear left t indicator circu circuit to pow circuit, high r
	B1248-11	Right Rear Turn Indicator - Circuit short to ground	▪ Rear right turn signal indicator circuit short circuit to ground	▪ Refer to the e circuit diagra the rear right indicator circu circuit to grou
	B1248-15	Right Rear Turn Indicator - Circuit short to battery or open	▪ Rear right turn signal indicator circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the rear right indicator circu circuit to pow circuit, high r

B1249-11	Start Button Illumination - Circuit short to ground	▪ Stop/start switch illumination circuit short circuit to ground ▪ Stop/start switch fault	▪ Refer to the e circuit diagra the stop/start illumination c circuit to grou circuit as requ the DTCs and ▪ If fault persist install a new s switch as requ
B1249-15	Start Button Illumination - Circuit short to battery or open	▪ Stop/start switch illumination circuit short circuit to power, open circuit, high resistance ▪ Stop/start switch fault	▪ Refer to the e circuit diagra the stop/start illumination c circuit to pow circuit, high r Repair circuit clear the DTC ▪ If fault persist install a new s switch as requ
B124A-11	Right Daytime Running Light - Circuit short to ground	▪ Right side daytime running light circuit short circuit to ground	▪ Refer to the e circuit diagra the right side running light short circuit t Repair circuit clear the DTC
B124A-15	Right Daytime Running Light - Circuit short to battery or open	▪ Right side daytime running light circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the right side running light short circuit t open circuit, resistance. Re required, clea and retest
B124A-84	Right Daytime Running Light - Signal Below Allowable Range	▪ Right side daytime running light circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the right side running light short circuit t short circuit t open circuit, resistance. Re

			▪ Lamp fault	required, clea and retest ▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ If fault persist install a new side lamp as
	B124A-85	Right Daytime Running Light - Signal Above Allowable Range	▪ Right side daytime running light circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the right side running light short circuit t short circuit t open circuit, resistance. Re required, clea and retest ▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ If fault persist install a new side lamp as
	B124A-86	Right Daytime Running Light - Signal Invalid	▪ Right side daytime running light circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the right side running light short circuit t short circuit t open circuit, resistance. Re required, clea and retest ▪ Refer to the e circuit diagra the right hea circuit for sho ground, short

				power, open resistance ▪ If fault persis install a new side lamp as
	B124B-11	Left Daytime Running Light - Circuit short to ground	▪ Left side daytime running light circuit short circuit to ground	▪ Refer to the circuit diagra the left side running light short circuit t Repair circuit clear the DT
	B124B-15	Left Daytime Running Light - Circuit short to battery or open	▪ Left side daytime running light circuit short circuit to power, open circuit, high resistance	▪ Refer to the circuit diagra the left side running light short circuit t open circuit, resistance. R required, cle and retest
	B124B-84	Left Daytime Running Light - Signal Below Allowable Range	▪ Left side daytime running light circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the circuit diagra the left side running light short circuit t short circuit t open circuit, resistance. R required, cle and retest ▪ Refer to the circuit diagra the left head circuit for sh ground, shor power, open resistance ▪ If fault persis install a new lamp as requ
	B124B-85	Left Daytime Running Light - Signal Above Allowable Range	▪ Left side daytime running light circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the circuit diagra the left side

			▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	running light short circuit t short circuit t open circuit, resistance. Re required, clea and retest ▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ If fault persist install a new lamp as requi
	B124B-86	Left Daytime Running Light - Signal Invalid	▪ Left side daytime running light circuit to ground, short circuit to power, open circuit, high resistance ▪ Headlamp LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the left side c running light short circuit t short circuit t open circuit, resistance. Re required, clea and retest ▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ If fault persist install a new lamp as requi
	B124C-04	Turn Indicator Stalk Switch Pack - System internal failures	▪ Left side steering column multifunction switch loose ▪ Left side steering column multifunction switch internal failure	▪ Tighten/re-to side steering multifunction ▪ Using the ma approved dia system, clear retest. If the f install a new l steering colu multifunction

B124C-71	Turn Indicator Stalk Switch Pack - Actuator stuck	▪ Left side steering column multifunction switch loose ▪ Left side steering column multifunction switch internal failure	▪ Tighten/re-to side steering multifunction ▪ Using the ma approved dia system, clear retest. If the install a new steering colu multifunction
B124E-04	Wiper Stalk Switch Pack - System internal failures	▪ Steering column right multifunction switch failure	▪ Using the ma approved dia system, clear retest. If the install a new column right switch
B124E-71	Wiper Stalk Switch Pack - Actuator stuck	▪ Steering column right multifunction switch failure	**NOTE:** Wipers and control swit retaining sc tightening t 0.7 Nm ▪ Check if the washers cont retaining scre tightened acc specifications Inappropriate screws might steering whe failure ▪ Using the ma approved dia system, clear retest. If the install a new washers cont
B1277-11	Reverse Lamp - Circuit short to ground	▪ Reverse lamp circuit short circuit to ground	▪ Refer to the circuit diagra

			the reverse la short circuit t Repair circuit clear the DTC
B1277-15	Reverse Lamp - Circuit short to battery or open	▪ Reverse lamp circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the reverse la short circuit t open circuit, resistance. Re required, clea and retest
B127B-11	Ambient Lighting Zone 1 Output Red LED - Circuit short to ground	▪ Red ambience lighting circuit short circuit to ground	▪ Refer to the e circuit diagra the red ambie circuit for sho ground. Repa required, clea and retest
B127B-12	Ambient Lighting Zone 1 Output Red LED - Circuit short to battery	▪ Red ambience lighting circuit short circuit to power	▪ Refer to the e circuit diagra the red ambie circuit for sho power. Repai required, clea and retest
B127B-15	Ambient Lighting Zone 1 Output Red LED - Circuit short to battery or open	▪ Red ambience lighting circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the red ambie circuit for sho power, open resistance. Re required, clea and retest
B1282-11	Ambient Lighting Zone 1 Output Blue LED - Circuit short to ground	▪ Blue ambience lighting circuit short circuit to ground	▪ Refer to the e circuit diagra the blue amb circuit for sho ground. Repa required, clea and retest
B1282-	Ambient Lighting	▪ Blue ambience lighting circuit short circuit to	▪ Refer to the e

12	Zone 1 Output Blue LED - Circuit short to battery	power	circuit diagra the blue amb circuit for sho power. Repai required, clea and retest
B1282-15	Ambient Lighting Zone 1 Output Blue LED - Circuit short to battery or open	▪ Blue ambience lighting circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the blue amb circuit for sho power, open resistance. Re required, clea and retest
B1298-73	Steering Column Adjust Up Switch - Actuator stuck closed	▪ Steering column adjustment switch failure	▪ Using the ma approved dia system, clear retest. If the f install a new s column adjus
B1299-73	Steering Column Adjust Down Switch - Actuator stuck closed	▪ Steering column adjustment switch failure	▪ Using the ma approved dia system, clear retest. If the f install a new s column adjus
B12A1-73	Steering Column Adjust Out Switch - Actuator stuck closed	▪ Steering column adjustment switch failure	▪ Using the ma approved dia system, clear retest. If the f install a new s column adjus
B12A2-73	Steering Column Adjust In Switch - Actuator stuck closed	▪ Steering column adjustment switch failure	▪ Using the ma approved dia system, clear retest. If the f install a new s column adjus
B12A3-11	Steering Column Adjust Motor Drive A - Circuit short to ground	▪ Steering column tilt adjustment motor circuit short circuit to ground	▪ Refer to the e circuit diagra the steering c adjustment m

			for short circu ▪ Refer to the e circuit diagra the steering c adjustment m for short circu
B12A3-12	Steering Column Adjust Motor Drive A - Circuit short to battery	▪ Steering column tilt adjustment motor circuit short circuit to power	▪ Refer to the e circuit diagra the steering c adjustment m for short circu ▪ Refer to the e circuit diagra the steering c adjustment m for short circu
B12A3-15	Steering Column Adjust Motor Drive A - Circuit short to battery or open	▪ Steering column tilt adjustment motor circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the steering c adjustment m for short circu open circuit, resistance ▪ Refer to the e circuit diagra the steering c adjustment m for short circu open circuit, resistance
B12A4-11	Steering Column Adjust Motor Drive B - Circuit short to ground	▪ Steering column reach adjustment motor circuit short circuit to ground	▪ Refer to the e circuit diagra the steering c adjustment m for short circu ▪ Refer to the e circuit diagra the steering c adjustment m for short circu
B12A4-12	Steering Column Adjust Motor Drive B - Circuit short to	▪ Steering column reach adjustment motor circuit short circuit to power	▪ Refer to the e circuit diagra the steering c

		battery		▪ adjustment m for short circu ▪ Refer to the e circuit diagra the steering c adjustment m for short circu
	B12A4-15	Steering Column Adjust Motor Drive B - Circuit short to battery or open	▪ Steering column reach adjustment motor circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the steering c adjustment m for short circu open circuit, resistance ▪ Refer to the e circuit diagra the steering c adjustment m for short circu open circuit, resistance
	B12A7-31	Steering Column Tilt Sensor A - No signal	▪ Steering column tilt adjustment motor position sensor circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the steering c adjustment m sensor circuit to ground, sh power, open resistance ▪ Refer to the e circuit diagra the steering c adjustment m short circuit t short circuit t open circuit, resistance
	B12A8-31	Steering Column Telescope Sensor A - No signal	▪ Steering column reach adjustment motor position sensor circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the steering c adjustment m sensor circuit to ground, sh power, open resistance

				▪ Refer to the e circuit diagra the steering c adjustment m short circuit t short circuit t open circuit, resistance
	B12CA-11	Start/Stop "Eco-Start" Status Indicator - Short circuit to ground	▪ ECO active warning indicator circuit short circuit to ground	▪ Refer to the e circuit diagra the ECO activ indicator circu circuit to grou
	B12CA-12	Start/Stop "Eco-Start" Status Indicator - Short circuit to battery	▪ ECO active warning indicator circuit short circuit to power	▪ Refer to the e circuit diagra the ECO activ indicator circu circuit to pow
	B12CB-23	Start/Stop "Eco-Start" Enable Button - Signal stuck low	▪ ECO switch circuit short circuit to ground	▪ Refer to the e circuit diagra the ECO swit short circuit t
	B12E2-23	Rear Door Unlock Switch - Interior - Signal stuck low	▪ Rear left door interior unlock switch circuit short circuit to ground ▪ Rear right door interior unlock switch circuit short circuit to ground	▪ Refer to the e circuit diagra the rear left c unlock switch short circuit t ▪ Refer to the e circuit diagra the rear right unlock switch short circuit t
	B12E4-23	Rear Door Lock Switch - Interior - Signal stuck low	▪ Rear left door interior lock switch circuit short circuit to ground ▪ Rear right door interior lock switch circuit short circuit to ground	▪ Refer to the e circuit diagra the rear left c lock switch ci circuit to grou ▪ Refer to the e circuit diagra the rear right lock switch ci circuit to grou

B12E7-23	Glove Box Switch - Signal stuck low	▪ Lower glovebox latch switch circuit short circuit to ground ▪ Lower glovebox latch switch stuck active	▪ Refer to the e circuit diagra the lower glo switch circuit circuit to grou ▪ Test the oper lower gloveb switch
B12E8-23	Liftgate/Tailgate Control/Release Switch - Signal stuck low	▪ Exterior tailgate open switch circuit short circuit to ground ▪ Exterior tailgate open switch stuck active	▪ Refer to the e circuit diagra the exterior t switch circuit circuit to grou ▪ Test the oper exterior tailga switch
B12EE-11	Liftgate/Tailgate/Trunk Release - Circuit short to ground	▪ Tailgate central door locking motor circuit short circuit to ground	▪ Refer to the e circuit diagra the tailgate c locking moto short circuit t
B12EE-15	Liftgate/Tailgate/Trunk Release - Circuit short to battery or open	▪ Tailgate central door locking motor circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the tailgate c locking moto short circuit t open circuit, resistance
B12EF-11	Trailer Fog Lamp - Circuit short to ground	▪ Trailer fog lamp circuit short circuit to ground	▪ Refer to the e circuit diagra the trailer fog for short circu
B12F3-11	Secondary Tailgate Release - Circuit short to ground	▪ Secondary tailgate release circuit short circuit to ground	▪ Refer to the e circuit diagra the secondary release circui circuit to grou
B12F3-15	Secondary Tailgate Release - Circuit short	▪ Secondary tailgate release circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra

		to battery or open		the secondar release circui circuit to pow circuit, high r
	B12F4-11	Vehicle Speed Output - Circuit short to ground	▪ Accessory road speed signal circuit short circuit to ground	**NOTE:** This DTC re hardwired s output from control moc can be usec aftermarket fitting wher width modu speed signa required. Th is not used standard ve required for aftermarket ▪ Refer to the circuit diagra the accessory signal circuit circuit to grou
	B12F4-12	Vehicle Speed Output - Circuit short to battery	▪ Accessory road speed signal circuit short circuit to power	**NOTE:** This DTC re hardwired s output from control moc can be usec aftermarket fitting wher width modu speed signa required. Th is not used standard ve required for aftermarket ▪ Refer to the circuit diagra

			the accessory signal circuit circuit to pow
B12F5-12	Fridge Relay Control - Circuit short to battery	▪ Fridge relay circuit short circuit to power	▪ Refer to the e circuit diagra the fridge rel short circuit t
B12F6-11	Headlamp Power Supply A - Circuit short to ground	▪ Left side lamp/daytime running lamps power supply circuit short circuit to ground ▪ Left headlamp failure	▪ Refer to the e circuit diagra the left side l running lamp supply circuit circuit to grou ▪ Using the ma approved dia system, clear retest. If the f install a new l
B12F6-12	Headlamp Power Supply A - Circuit short to battery	▪ Left side lamp/daytime running lamps power supply circuit short circuit to power ▪ Left headlamp failure	▪ Refer to the e circuit diagra the left side l running lamp supply circuit circuit to pow ▪ Using the ma approved dia system, clear retest. If the f install a new l
B12F6-15	Headlamp Power Supply A - Circuit short to battery or open	▪ Left side lamp/daytime running lamps power supply circuit short circuit to power, open circuit, high resistance ▪ Left headlamp failure	▪ Refer to the e circuit diagra the left side l running lamp supply circuit circuit to pow circuit, high r ▪ Using the ma approved dia system, clear retest. If the f install a new l
B12F7-	Single Wipe Switch -	▪ Single wipe switch circuit short circuit to ground	▪ Refer to the e

11	Circuit short to ground	▪ Wipers and washers control switch fault	circuit diagra the single wi circuit for sho ground. Repa required, clea and retest ▪ If fault persist install a new required. Cle and retest
B12F7-15	Single Wipe Switch - Circuit short to battery or open	▪ Single wipe switch circuit short circuit to power, open circuit, high resistance ▪ Wipers and washers control switch fault	▪ Refer to the circuit diagra the single wi circuit for sho power, open resistance. Re required, clea and retest ▪ If fault persist install a new required. Cle and retest
B12F7-1C	Single Wipe Switch - Circuit Voltage Out Of Range	▪ Single wipe switch circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Wipers and washers control switch fault	▪ Refer to the circuit diagra the single wi circuit for sho ground, short power, open resistance. Re required, clea and retest ▪ If fault persist install a new required. Cle and retest
B130B-11	Right Rear Fog Lamp - Circuit short to ground	▪ Rear right fog lamp circuit short circuit to ground	▪ Refer to the circuit diagra the rear right circuit for sho ground
B130B-12	Right Rear Fog Lamp - Circuit short to battery	▪ Rear right fog lamp circuit short circuit to power	▪ Refer to the circuit diagra the rear right circuit for sho

				power
	B130B-15	Right Rear Fog Lamp - Circuit short to battery or open	▪ Rear right fog lamp circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the rear right circuit for sho power, open resistance
	B130E-11	Left Rear Fog Lamp - Circuit short to ground	▪ Rear left fog lamp circuit short circuit to ground	▪ Refer to the e circuit diagra the rear left f circuit for sho ground
	B130E-12	Left Rear Fog Lamp - Circuit short to battery	▪ Rear left fog lamp circuit short circuit to power	▪ Refer to the e circuit diagra the rear left f circuit for sho power
	B130E-15	Left Rear Fog Lamp - Circuit short to battery or open	▪ Rear left fog lamp circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the rear left f circuit for sho power, open resistance
	B1311-87	Clock Module - Missing Message	▪ Clock status signal not received ▪ Clock circuit fault ▪ Clock internal failure	**NOTE:** This DTC m stored even no fault con present and be ignored customer ha reported an clock conce the DTC and Verify the cu concern pric diagnosis ▪ Refer to the e circuit diagra the fused sup

				the clock. Wi supply in the remove and r fuse ▪ Refer to the e circuit diagra the LIN circui clock and the module. Repa required, clea and retest ▪ If fault persist install a new required. Cle and retest
	B1316-11	Boot/Trunk Latch Power Close Unit - Circuit short to ground	▪ Tailgate soft close actuator circuit short circuit to ground	▪ Refer to the e circuit diagra the tailgate s actuator circu circuit to grou
	B1316-12	Boot/Trunk Latch Power Close Unit - Circuit short to battery	▪ Tailgate soft close actuator circuit short circuit to power	▪ Refer to the e circuit diagra the tailgate s actuator circu circuit to pow
	B1316-15	Boot/Trunk Latch Power Close Unit - Circuit short to battery or open	▪ Tailgate soft close actuator circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the tailgate s actuator circu circuit to pow circuit, high r
	B1316-1D	Boot/Trunk Latch Power Close Unit - Circuit Current Out Of Range	▪ Tailgate soft close actuator circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the tailgate s actuator circu circuit to grou circuit to pow circuit, high r
	B1323-23	Horn Switch - Signal Stuck Low	▪ Horn switch fault	▪ Check the op horn switch a required

	B134E-14	Switch Illumination Adjustment Control - Circuit short to ground or open	▪ Dimmer switch signal circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the dimmer s circuit for sho ground, oper resistance
	B136A-11	Heated Washer Jet/Nozzle Output Control - Circuit short to ground	▪ Heated washer jet/nozzle output control circuit short to ground	▪ Refer to the e circuit diagra the heated w jet/nozzle ou circuit for sho ground
	B136A-15	Heated Washer Jet/Nozzle Output Control - Circuit short to battery or open	▪ Heated washer jet/nozzle output control circuit short to power, open circuit, high resistance	▪ Refer to the e circuit diagra the heated w jet/nozzle ou circuit for sho power, open resistance
	B136B-11	Suspension Control Module Wake-up Signal - Circuit short to ground	▪ Air suspension wake up signal circuit short circuit to ground	▪ Refer to the e circuit diagra the air susper signal circuit circuit to grou
	B136B-15	Suspension Control Module Wake-up Signal - Circuit short to battery or open	▪ Air suspension wake up signal circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the air susper signal circuit circuit to pow circuit, high r
	B136C-11	Headlamp Delay Control - Circuit short to ground	▪ Headlamp delay control circuit short circuit to ground ▪ Headlamp delay switch fault	▪ Refer to the e circuit diagra the headlamp control circui circuit to grou circuit as requ the DTCs anc ▪ If fault persist install a new l delay switch a
	B136C-	Headlamp Delay	▪ Headlamp delay control circuit short circuit to	▪ Refer to the e

15	Control - Circuit short to battery or open	power, open circuit, high resistance ▪ Headlamp delay switch fault	circuit diagra the headlamp control circui circuit to pow circuit, high r Repair circuit clear the DTC ▪ If fault persist install a new l delay switch a
B136D-11	Front Wiper Intermittent Delay Control - Circuit short to ground	▪ Wiper control switch short circuit to ground ▪ Switch fault	▪ Refer to the e circuit diagra the wiper con short circuit t Repair circuit clear the DTC ▪ If fault persist install a new s required. Cle and retest
B136D-15	Front Wiper Intermittent Delay Control - Circuit short to battery or open	▪ Wiper control switch short circuit to power, open circuit, high resistance ▪ Switch fault	▪ Refer to the e circuit diagra the wiper con short circuit t open circuit, resistance. Re required, clea and retest ▪ If fault persist install a new s required. Cle and retest
B136D-1C	Front Wiper Intermittent Delay Control - Circuit Voltage Out Of Range	▪ Wiper control switch short circuit to ground, short circuit to power, open circuit, high resistance ▪ Switch fault	▪ Refer to the e circuit diagra the wiper con ground, short power, open resistance. Re required, clea and retest ▪ If fault persist install a new s required. Cle and retest

	B136E-11	Glove Box Release Motor - Circuit short to ground	▪ Glovebox latch motor circuit short circuit to ground	▪ Refer to the e circuit diagra the glovebox circuit for sho ground
	B136E-15	Glove Box Release Motor - Circuit short to battery or open	▪ Glovebox latch motor circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the glovebox circuit for sho power, open resistance
	B137F-16	Steering Wheel Left Switch Pack - Circuit voltage below threshold	▪ Steering wheel left switchpack failure	▪ Using the ma approved dia system, clear retest. If the f install a new s wheel left sw
	B137F-17	Steering Wheel Left Switch Pack - Circuit voltage above threshold	▪ Steering wheel left switchpack failure	▪ Using the ma approved dia system, clear retest. If the f install a new s wheel left sw
	B137F-49	Steering Wheel Left Switch Pack - Internal electronic failure	▪ Steering wheel left switchpack failure	▪ Using the ma approved dia system, clear retest. If the f install a new s wheel left sw
	B1380-16	Steering Wheel Right Switch Pack - Circuit voltage below threshold	▪ Steering wheel right switchpack failure	▪ Using the ma approved dia system, clear retest. If the f install a new s wheel right sv
	B1380-17	Steering Wheel Right Switch Pack - Circuit voltage above threshold	▪ LIN fault ▪ Rotary coupler fault ▪ Paddle switch fault ▪ Switch pack fault	▪ Refer to the e circuit diagra the LIN circui steering whee the central ju short circuit t

				short circuit t open circuit, resistance. Re required. Cle retest ▪ Check the op rotary couple right side ste switch pack p ground circui circuit to gro circuit to pow circuit, high r Repair circuit required. Cle retest ▪ Check the co operation of paddle switch required. Cle retest ▪ Check the op right side ste switch pack c LIN bus circui switch). If the replace the ri steering whe
	B1380-49	Steering Wheel Right Switch Pack - Internal electronic failure	▪ Steering wheel right switchpack failure	▪ Using the ma approved dia system, clear retest. If the install a new wheel right s
	B1380-87	Steering Wheel Right Switch Pack - Missing message	▪ Steering wheel right switchpack power or ground circuit open circuit, high resistance ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Steering wheel right switchpack failure	▪ Refer to the e circuit diagra the steering w switchpack p ground circui circuit, high r Check harnes routing, dama connection / pins. Repair c required, clea and retest ▪ Refer to the e circuit diagra

				the steering … circuit for sho… ground, short… power, open … resistance ▪ Using the ma… approved dia… system, clear… retest. If the… install a new … wheel right s…
	B13BD-87	Steering Wheel Heater Module - Missing message	▪ Steering wheel harness failure ▪ Steering wheel heater control module power or ground circuit open circuit, high resistance ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Steering wheel heater control module failure	▪ Check steerin… harness for c… damage, poo… backed out p… circuit as requ… the DTCs and… ▪ Refer to the e… circuit diagra… the steering … control modu… ground circui… circuit, high r… ▪ Refer to the e… circuit diagra… the steering … circuit for sho… ground, short… power, open … resistance ▪ Using the ma… approved dia… system, clear… retest. If the… install a new … wheel heater… module
	B13C0-1C	Washer Switch - Circuit voltage out of range	▪ Steering column right multifunction switch failure	**NOTE:** Wipers and … control swit… retaining sc… tightening t… 0.7 Nm

				- Check if the v washers cont retaining scre tightened acc specifications Inappropriate screws might steering whe failure - Using the ma approved dia system, clear retest. If the f install a new v washers cont
	B13C1-1C	Fog Lamp Control Switch - Circuit voltage out of range	- Steering column right multifunction switch failure	**NOTE:** Steering col multifunctio retaining scr tightening t 0.7 Nm - Check if the v washers cont retaining scre tightened acc specifications Inappropriate screws might steering whe failure - Using the ma approved dia system, clear retest. If the f install a new s column right switch
	B13C8-11	Headlamp Power Supply B - Circuit short to ground	- Right side lamp/daytime running lamps power supply circuit short circuit to ground - Right headlamp failure	- Refer to the e circuit diagra the right side lamp/daytime lamps power for short circu

				Using the ma approved dia system, clear retest. If the install a new headlamp
	B13C8-12	Headlamp Power Supply B - Circuit short to battery	Right side lamp/daytime running lamps power supply circuit short circuit to power Right headlamp failure	Refer to the circuit diagra the right side lamp/daytime lamps power for short circu Using the ma approved dia system, clear retest. If the install a new headlamp
	B13C8-15	Headlamp Power Supply B - Circuit short to battery or open	Right side lamp/daytime running lamps power supply circuit short circuit to power, open circuit, high resistance Right headlamp failure	Refer to the circuit diagra the right side lamp/daytime lamps power for short circu open circuit, resistance Using the ma approved dia system, clear retest. If the install a new headlamp
	B13CB-46	Roof Blind Module - Calibration/parameter memory failure	Roof blind control module failure	Using the ma approved dia system, clear retest. If the install a new panel control
	B13CB-87	Roof Blind Module - Missing message	Roof blind control module power or ground circuit open circuit, high resistance LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance Roof opening panel control module failure	Refer to the circuit diagra the roof oper control modu ground circui circuit, high r

			▪ Refer to the e circuit diagra the LIN bus c circuit to grou circuit to pow circuit, high r ▪ Using the ma approved dia system, clear retest. If the f install a new r panel control
B13CD-4B	Roof Blind - Over temperature	▪ Roof opening panel blind operation protection measures have been activated ▪ Excessive continuous operation of the roof opening panel blind	**NOTE:** This DTC m when the ro opening pan has been op repeatedly, the roof ope panel motor temporarily ▪ Check the roo panel blind fo operation. Re necessary ▪ Using the ma approved dia system, clear retest. If the f install a new r panel control
B13CD-74	Roof Blind - Actuator slipping	▪ Roof blind control module failure ▪ Roof blind open/close switch stuck active	▪ Check the op roof opening ▪ Clear the DTC roof opening open/close sw opening pane correct opera as necessary. DTCs and ret ▪ Refer to the e circuit diagra the roof blind

				module circu circuit to gro circuit to pow circuit, high r Check the ha of damage. R as required - Test the oper roof opening open/close s new roof ope open/close s necessary - Using the ma approved dia system, clear retest. If the install a new panel control
	B13CD-93	Roof Blind - No operation	- Roof blind control module harness fault - Roof blind motor is not calibrated correctly - Roof blind control module failure	- Refer to the e circuit diagra the roof blind module circu circuit to gro circuit to pow circuit, high r Check the ha of damage. R as required - Using the JLR diagnostic eq perform routi Roof Blind (0 the DTCs and - Run engine fo seconds and blind (openin several times DTC does no - If the fault pe new roof blin
	B13CD-9A	Roof Blind - Component or system operating conditions	- Roof opening panel blind operation protection measures have been activated - Excessive repeated operation of the roof opening panel blind	

				NOTE: This DTC m when the ro opening pa has been op repeatedly, the roof ope panel blind be tempora disabled ▪ Using the ma approved dia system, clear retest
	B13CF-31	Roof Blind Position Sensor A - No signal	▪ Roof blind control module failure	▪ Using the ma approved dia system, perfo Sunroof Calib (0x2039). Cle and retest. If persists, insta opening pane module
	B13D0-31	Roof Blind Position Sensor B - No signal	▪ Roof blind control module failure	▪ Using the ma approved dia system, perfo Sunroof Calib (0x2039). Cle and retest. If persists, insta opening pane module
	B13D3-04	Left Daytime Running Lamp And Position Lamp Control - System internal failures	▪ Left headlamp failure	▪ Using the ma approved dia system, clear retest. If the install a new
	B13D3-24	Left Daytime Running Lamp And Position Lamp Control - Signal stuck high	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp failure	▪ Refer to the circuit diagra the left headl circuit for sho

				ground, shor power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new
	B13D3-84	Left Daytime Running Lamp And Position Lamp Control - Signal below allowable range	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp failure	▪ Refer to the e circuit diagra the left headl circuit for sho ground, shor power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new
	B13D3-85	Left Daytime Running Lamp And Position Lamp Control - Signal above allowable range	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp failure	▪ Refer to the e circuit diagra the left headl circuit for sho ground, shor power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new
	B13D3-86	Left Daytime Running Lamp And Position Lamp Control - Signal invalid	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp failure	▪ Refer to the e circuit diagra the left headl circuit for sho ground, shor power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new

	B13D4-04	Right Daytime Running Lamp And Position Lamp Control - System internal failures	▪ Right headlamp failure	▪ Using the ma approved dia system, clear retest. If the install a new headlamp
	B13D4-24	Right Daytime Running Lamp And Position Lamp Control - Signal stuck high	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp failure	▪ Refer to the circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new headlamp
	B13D4-84	Right Daytime Running Lamp And Position Lamp Control - Signal below allowable range	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp failure	▪ Refer to the circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new headlamp
	B13D4-85	Right Daytime Running Lamp And Position Lamp Control - Signal above allowable range	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp failure	▪ Refer to the circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new headlamp

B13D4-86	Right Daytime Running Lamp And Position Lamp Control - Signal invalid	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp failure	▪ Refer to the e circuit diagra the right head circuit for sho ground, short power, open resistance ▪ Using the ma approved dia system, clear retest. If the f install a new r headlamp
B13D8-11	Right Reverse Lamp - Circuit short to ground	▪ Right reverse lamp circuit short circuit to ground	▪ Refer to the e circuit diagra the right reve circuit for sho ground
B13D8-15	Right Reverse Lamp - Circuit short to battery or open	▪ Right reverse lamp circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the right reve circuit for sho power, open resistance
B13DB-11	Left Reverse Lamp - Circuit short to ground	▪ Left reverse lamp circuit short circuit to ground	▪ Refer to the e circuit diagra the left revers for short circu
B13DB-15	Left Reverse Lamp - Circuit short to battery or open	▪ Left reverse lamp circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the left revers for short circu open circuit, resistance
B13DC-11	Glove Box Release Motor 2 - Circuit short to ground	▪ Upper glovebox latch motor circuit short circuit to ground	▪ Refer to the e circuit diagra the upper glo motor circuit circuit to grou
B13DC-	Glove Box Release	▪ Upper glovebox latch motor circuit short circuit	▪ Refer to the e

	15	Motor 2 - Circuit short to battery or open	to power, open circuit, high resistance	circuit diagra the upper glo motor circuit circuit to pow circuit, high r
	B13FD-12	Active Exhaust Relay Control Circuit - Circuit short to battery	▪ Active exhaust relay control circuit short circuit to power	▪ Refer to the e circuit diagra the active exh control circuit circuit to pow
	B13FD-14	Active Exhaust Relay Control Circuit - Circuit short to ground or open	▪ Active exhaust relay control circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the active exh control circuit circuit to grou circuit, high r
	B1465-23	Glove Box Switch 2 - Signal stuck low	▪ Upper glovebox latch switch circuit short circuit to ground ▪ Upper glovebox latch switch stuck active	▪ Refer to the e circuit diagra the upper glo switch circuit circuit to grou ▪ Test the oper upper gloveb switch
	B146B-04	Left Front Side Marker Lamp - System internal failures	▪ Left headlamp failure	▪ Using the ma approved dia system, clear retest. If the f install a new l
	B146B-11	Left Front Side Marker Lamp - Circuit short to ground	▪ Front left side marker lamp circuit short circuit to ground ▪ Left headlamp failure	▪ Refer to the e circuit diagra the front left lamp circuit fo to ground ▪ Using the ma approved dia system, clear retest. If the f install a new l
	B146B-	Left Front Side Marker	▪ Front left side marker lamp circuit short circuit	▪ Refer to the e

12	Lamp - Circuit short to battery	to power ▪ Left headlamp failure	circuit diagra the front left lamp circuit f to power ▪ Using the ma approved dia system, clear retest. If the install a new
B146B-15	Left Front Side Marker Lamp - Circuit short to battery or open	▪ Front left side marker lamp circuit short circuit to power, open circuit, high resistance ▪ Left headlamp failure	▪ Refer to the circuit diagra the front left lamp circuit f to power, op high resistan ▪ Using the ma approved dia system, clear retest. If the install a new
B146B-23	Left Front Side Marker Lamp - Signal stuck low	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp failure	▪ Refer to the circuit diagra the left headl circuit for sho ground, shor power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new
B146B-24	Left Front Side Marker Lamp - Signal stuck high	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp failure	▪ Refer to the circuit diagra the left headl circuit for sho ground, shor power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new

	B146B-29	Left Front Side Marker Lamp - Signal invalid	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp failure	▪ Refer to the e circuit diagra the left headl circuit for sho ground, shor power, open resistance ▪ Using the ma approved dia system, clear retest. If the f install a new l
	B146C-04	Right Front Side Marker Lamp - System internal failures	▪ Right headlamp failure	▪ Using the ma approved dia system, clear retest. If the f install a new r headlamp
	B146C-11	Right Front Side Marker Lamp - Circuit short to ground	▪ Front right side marker lamp circuit short circuit to ground ▪ Right headlamp failure	▪ Refer to the e circuit diagra the front righ lamp circuit f to ground ▪ Using the ma approved dia system, clear retest. If the f install a new r headlamp
	B146C-12	Right Front Side Marker Lamp - Circuit short to battery	▪ Front right side marker lamp circuit short circuit to power ▪ Right headlamp failure	▪ Refer to the e circuit diagra the front righ lamp circuit f to power ▪ Using the ma approved dia system, clear retest. If the f install a new r headlamp
	B146C-15	Right Front Side Marker Lamp - Circuit short to battery or open	▪ Front right side marker lamp circuit short circuit to power, open circuit, high resistance ▪ Right headlamp failure	▪ Refer to the e circuit diagra the front righ lamp circuit f

				to power, op high resistan ▪ Using the ma approved dia system, clear retest. If the install a new headlamp
	B146C-23	Right Front Side Marker Lamp - Signal stuck low	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp failure	▪ Refer to the circuit diagra the right hea circuit for sho ground, shor power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new headlamp
	B146C-24	Right Front Side Marker Lamp - Signal stuck high	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp failure	▪ Refer to the circuit diagra the right hea circuit for sho ground, shor power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new headlamp
	B146C-29	Right Front Side Marker Lamp - Signal invalid	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp failure	▪ Refer to the circuit diagra the right hea circuit for sho ground, shor power, open resistance ▪ Using the ma approved dia system, clear retest. If the

				install a new [cut off] headlamp
	B147A-12	Washer Fluid Transfer Pump Relay Control - Circuit short to battery	▪ Rear washer pump relay circuit short circuit to power ▪ Relay fault	▪ Refer to the e[cut off] circuit diagra[cut off] the rear wash[cut off] circuit for sho[cut off] power. Repai[cut off] required, clea[cut off] and retest ▪ If fault persist[cut off] install a new [cut off] transfer pump[cut off] required. Cle[cut off] and retest
	B147A-14	Washer Fluid Transfer Pump Relay Control - Circuit short to ground or open	▪ Rear washer pump relay circuit short circuit to ground, open circuit, high resistance ▪ Relay fault	▪ Refer to the e[cut off] circuit diagra[cut off] the rear wash[cut off] circuit for sho[cut off] ground, open[cut off] resistance. Re[cut off] required, clea[cut off] and retest ▪ If fault persist[cut off] install a new [cut off] transfer pump[cut off] required. Cle[cut off] and retest
	B148E-23	Secondary Tailgate Release Switch - Signal Stuck Low	▪ Global tailgate close switch circuit short circuit to ground	▪ Refer to the e[cut off] circuit diagra[cut off] the global tai[cut off] switch circuit[cut off] circuit to grou[cut off]
	B1491-11	Ignition Supply A - Circuit short to ground	▪ Ignition 1 supply circuit(s) short circuit to ground	▪ Refer to the e[cut off] circuit diagra[cut off] the ignition 1[cut off] circuit(s) for s[cut off] ground
	B1491-15	Ignition Supply A - Circuit short to battery or open	▪ Ignition 1 supply circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e[cut off] circuit diagra[cut off] the ignition 1[cut off] circuit(s) for s[cut off] power, open [cut off]

				resistance
	B14BB-11	Ignition Supply B - Circuit short to ground	▪ Ignition 2 supply circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the ignition 2 circuit(s) for s ground
	B14BB-15	Ignition Supply B - Circuit short to battery or open	▪ Ignition 2 supply circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the ignition 2 circuit(s) for s power, open resistance
	B14BC-11	Ignition Supply C - Circuit short to ground	▪ Ignition 3 supply circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the Ignition 3 circuit(s) for s ground
	B14BC-15	Ignition Supply C - Circuit short to battery or open	▪ Ignition 3 supply circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the Ignition 3 circuit(s) for s power, open resistance
	B14BD-11	Ignition Supply D - Circuit short to ground	▪ Ignition 4 supply circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the Ignition 4 circuit(s) for s ground
	B14BD-15	Ignition Supply D - Circuit short to battery or open	▪ Ignition 4 supply circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the Ignition 4 circuit(s) for s power, open resistance
	B14BE-11	Ignition Supply E - Circuit short to ground	▪ Ignition 5 supply circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the Ignition 5 circuit(s) for s ground

B14BE-15	Ignition Supply E - Circuit short to battery or open	▪ Ignition 5 supply circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the Ignition 5 circuit(s) for s power, open resistance
B14BF-11	Ignition Supply F - Circuit short to ground	▪ Ignition 6 supply circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the Ignition 6 circuit(s) for s ground
B14BF-15	Ignition Supply F - Circuit short to battery or open	▪ Ignition 6 supply circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the Ignition 6 circuit(s) for s power, open resistance
B14C0-11	Ignition Supply G - Circuit short to ground	▪ Ignition 7 supply circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the Ignition 7 circuit(s) for s ground
B14C0-15	Ignition Supply G - Circuit short to battery or open	▪ Ignition 7 supply circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the Ignition 7 circuit(s) for s power, open resistance
B14C1-11	Ignition Supply H - Circuit short to ground	▪ Ignition 8 supply circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the Ignition 8 circuit(s) for s ground
B14C1-15	Ignition Supply H - Circuit short to battery or open	▪ Ignition 8 supply circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the Ignition 8 circuit(s) for s power, open resistance

	B14C2-11	Ignition Supply I - Circuit short to ground	▪ Ignition 9 supply circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the Ignition 9 circuit(s) for s ground
	B14C2-15	Ignition Supply I - Circuit short to battery or open	▪ Ignition 9 supply circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the Ignition 9 circuit(s) for s power, open resistance
	B14C3-11	Ignition Supply J - Circuit short to ground	▪ Extended ignition control 2 circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the extended control 2 circ circuit to grou
	B14C3-15	Ignition Supply J - Circuit short to battery or open	▪ Extended ignition control 2 circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the extended control 2 circ circuit to pow circuit, high r
	B14C4-11	Restraints Ignition Supply A - Circuit short to ground	▪ Restraints ignition supply 1 circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the restraints supply 1 circu circuit to grou
	B14C4-15	Restraints Ignition Supply A - Circuit short to battery or open	▪ Restraints ignition supply 1 circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the restraints supply 1 circu circuit to pow circuit, high r
	B14C5-11	Restraints Ignition Supply B - Circuit short to ground	▪ Restraints ignition supply 2 circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the restraints supply 2 circu circuit to grou
	B14C5-	Restraints Ignition	▪ Restraints ignition supply 2 circuit(s) short	▪ Refer to the e

15	Supply B - Circuit short to battery or open	circuit to power, open circuit, high resistance	circuit diagra the restraints supply 2 circu circuit to pow circuit, high r
B14C6-11	Rear Washer Pump - Circuit short to ground	▪ Washer pump circuit short circuit to ground	▪ Refer to the e circuit diagra the washer p for short circu
B14C6-12	Rear Washer Pump - Circuit short to battery	▪ Washer pump circuit short circuit to power	▪ Refer to the e circuit diagra the washer p for short circu
B14C6-13	Rear Washer Pump - Circuit open	▪ Washer pump circuit open circuit, high resistance	▪ Refer to the e circuit diagra the washer p for open circu resistance
B14C7-12	Quiescent Current Relay A On Control - Circuit short to battery	▪ Quiescent current control module relay 1 ON circuit short circuit to power	▪ Refer to the e circuit diagra the quiescent control modu circuit for sho power
B14C7-14	Quiescent Current Relay A On Control - Circuit short to ground or open	▪ Quiescent current control module relay 1 ON circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the quiescent control modu circuit for sho ground, oper resistance
B14C8-12	Quiescent Current Relay A Off Control - Circuit short to battery	▪ Quiescent current control module relay 1 OFF circuit short circuit to power	▪ Refer to the e circuit diagra the quiescent control modu OFF circuit fo to power
B14C8-14	Quiescent Current Relay A Off Control -	▪ Quiescent current control module relay 1 OFF circuit short circuit to ground, open circuit, high	▪ Refer to the e circuit diagra

	Circuit short to ground or open	resistance	the quiescent control modu OFF circuit fo to ground, op high resistanc
B14C9-12	Quiescent Current Relay B On Control - Circuit short to battery	▪ Quiescent current control module relay 2 ON circuit short circuit to power	▪ Refer to the e circuit diagra the quiescent control modu circuit for sho power
B14C9-14	Quiescent Current Relay B On Control - Circuit short to ground or open	▪ Quiescent current control module relay 2 ON circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the quiescent control modu circuit for sho ground, open resistance
B14CA-12	Quiescent Current Relay B Off Control - Circuit short to battery	▪ Quiescent current control module relay 2 OFF circuit short circuit to power	▪ Refer to the e circuit diagra the quiescent control modu OFF circuit fo to power
B14CA-14	Quiescent Current Relay B Off Control - Circuit short to ground or open	▪ Quiescent current control module relay 2 OFF circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the quiescent control modu OFF circuit fo to ground, op high resistanc
B14CB-12	Quiescent Current Relay C On Control - Circuit short to battery	▪ Quiescent current control module relay 3 ON circuit short circuit to power	▪ Refer to the e circuit diagra the quiescent control modu circuit for sho power
B14CB-14	Quiescent Current Relay C On Control - Circuit short to ground or open	▪ Quiescent current control module relay 3 ON circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the quiescent control modu circuit for sho

			ground, oper resistance
B14CC-12	Quiescent Current Relay C Off Control - Circuit short to battery	▪ Quiescent current control module relay 3 OFF circuit short circuit to power	▪ Refer to the e circuit diagra the quiescent control modu OFF circuit fo to power
B14CC-14	Quiescent Current Relay C Off Control - Circuit short to ground or open	▪ Quiescent current control module relay 3 OFF circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the quiescent control modu OFF circuit fo to ground, op high resistanc
B14CD-12	Quiescent Current Relay D On Control - Circuit short to battery	▪ Quiescent current control module relay 4 ON circuit short circuit to power	▪ Refer to the e circuit diagra the quiescent control modu circuit for sho power
B14CD-14	Quiescent Current Relay D On Control - Circuit short to ground or open	▪ Quiescent current control module relay 4 ON circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the quiescent control modu circuit for sho ground, oper resistance
B14CE-12	Quiescent Current Relay D Off Control - Circuit short to battery	▪ Quiescent current control module relay 4 OFF circuit short circuit to power	▪ Refer to the e circuit diagra the quiescent control modu OFF circuit fo to power
B14CE-14	Quiescent Current Relay D Off Control - Circuit short to ground or open	▪ Quiescent current control module relay 4 OFF circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the quiescent control modu OFF circuit fo to ground, op high resistanc

B14CF-11	Trailer Reverse Light - Circuit short to ground	▪ Trailer socket reverse light circuit short circuit to ground	**NOTE:** Remove the connector fr trailer socke testing for c faults ▪ Refer to the e circuit diagra the trailer soc light circuit fo to ground
B14D8-11	Left Trailer Position Lamp - Circuit short to ground	▪ Trailer socket left tail light circuit short circuit to ground	**NOTE:** Remove the connector fr trailer socke testing for c faults ▪ Refer to the e circuit diagra the trailer soc light circuit fo to ground
B14DF-11	Right Trailer Position Lamp - Circuit short to ground	▪ Trailer socket right tail light circuit short circuit to ground	**NOTE:** Remove the connector fr trailer socke testing for c faults ▪ Refer to the e circuit diagra the trailer soc light circuit fo to ground

B1A75-11	Fuel Sender No.1 - Circuit short to ground	▪ Fuel level sender active unit circuit short circuit to ground	▪ Refer to the e circuit diagra the fuel level unit circuit fo to ground
B1A75-15	Fuel Sender No.1 - Circuit short to battery or open	**NOTE:** Circuit reference - I_FUEL_SENSOR_PUMP ▪ Fuel level sender active unit circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the fuel level unit circuit fo to power, op high resistanc
B1A75-1C	Fuel Sender No.1 - Circuit voltage out of range	▪ Fuel level sender active unit failure	▪ Install a new sender active
B1A76-11	Fuel Sender No.2 - Circuit short to ground	▪ Fuel level sender passive unit circuit short circuit to ground	▪ Refer to the e circuit diagra the fuel level passive unit c short circuit t
B1A76-15	Fuel Sender No.2 - Circuit short to battery or open	▪ Fuel level sender passive unit circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the fuel level passive unit c short circuit t open circuit, resistance
B1A76-1C	Fuel Sender No.2 - Circuit voltage out of range	▪ Fuel level sender passive unit failure	▪ Install a new sender passiv
B1A78-12	Front Fog Lamp - Circuit short to battery	▪ Front fog light circuit short circuit to power	▪ Refer to the e circuit diagra the front fog for short circu
B1A78-14	Front Fog Lamp - Circuit short to ground or open	▪ Front fog light circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the front fog for short circu open circuit,

			resistance
B1A79-11	Rear Fog Lamp - Circuit short to ground	▪ Rear right fog light circuit short circuit to ground	▪ Refer to the e circuit diagra the rear right circuit for sho ground
B1A79-12	Rear Fog Lamp - Circuit short to battery	▪ Rear right fog light circuit short circuit to power	▪ Refer to the e circuit diagra the rear right circuit for sho power
B1A79-15	Rear Fog Lamp - Circuit short to battery or open	▪ Rear right fog light circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the rear right circuit for sho power, open resistance
B1A85-96	Ambient Light Sensor - Component internal failure	▪ Rain/light sensor failure	▪ Using the ma approved dia system, clear retest. If the f install a new r sensor
B1A91-31	Speed/Position Sensor A - No signal	▪ Roof opening panel control module failure	▪ Using the ma approved dia system, perfo Sunroof Calib Clear the DT If the fault pe new roof ope control modu
B1A92-31	Speed/Position Sensor B - No signal	▪ Roof opening panel control module failure	▪ Using the ma approved dia system, perfo Sunroof Calib Clear the DT If the fault pe new roof ope control modu

	B1B01-64	Key Transponder - Signal plausibility failure	▪ Encrypted data exchange between keyless vehicle module and body control module does not match ▪ Keyless vehicle module power or ground circuit open circuit, high resistance ▪ Medium speed CAN bus (body) circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Re-synchronis reconfiguring control modu module. Re-s by reconfigur keyless vehicl new module ▪ Refer to the e circuit diagra the keyless ve power and gr for open circu resistance ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the medium s bus (body) cir circuit to grou circuit to pow circuit, high r
	B1B01-81	Key Transponder - Invalid serial data received	▪ Encrypted data exchange between keyless vehicle module and body control module does not match ▪ Keyless vehicle module power or ground circuit open circuit, high resistance ▪ Medium speed CAN bus (body) circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Re-synchronis reconfiguring control modu module. Re-s by reconfigur keyless vehicl new module ▪ Refer to the e circuit diagra the keyless ve power and gr for open circu resistance ▪ Using the ma approved dia system, perfo network integ Refer to the e circuit diagra the medium s bus (body) cir circuit to grou circuit to pow circuit, high r

B1B33-51	Target ID Transfer - Not programmed	▪ A new powertrain control module has been installed	▪ Re-synchronis reconfiguring powertrain co as a new mod DTCs and ret
B1B33-81	PATS Challenge Error - Invalid serial data received	▪ Failed communication with powertrain control module	▪ No action ne clear/ignore I
B1B56-46	Sunroof Module - Calibration/parameter memory failure	▪ Roof opening panel control module failure	▪ Using the ma approved dia system, perfo Sunroof Calib (0x2039). Cle and retest. If persists, insta opening pane module
B1B56-87	Sunroof Module - Missing message	▪ Roof opening panel control module power or ground circuit open circuit, high resistance ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the roof oper control modu ground circui circuit, high r ▪ Refer to the e circuit diagra the roof oper bus circuit fo to ground, sh power, open resistance
B1C32-11	Steering Column Tilt Solenoid - Circuit short to ground	▪ Steering column tilt solenoid circuit short circuit to ground ▪ Steering column tilt solenoid internal failure	**NOTE:** This compo serviceable ▪ Refer to the e circuit diagra the steering c solenoid circu circuit to grou circuit as requ the DTCs and ▪ If fault persist

			install a new s column tilt so required
B1C32-15	Steering Column Tilt Solenoid - Circuit short to battery or open	▪ Steering column tilt solenoid circuit short circuit to power, open circuit, high resistance ▪ Steering column tilt solenoid internal failure	**NOTE:** This compo serviceable ▪ Refer to the e circuit diagra the steering c solenoid circu circuit to pow circuit, high r Repair circuit clear the DTC ▪ If fault persist install a new s column tilt so required
B1C33-12	Steering Column Tilt Feedback Signal - Circuit short to battery	▪ Steering column tilt feedback signal circuit short circuit to power	▪ Refer to the e circuit diagra the steering c feedback sign short circuit t Repair circuit clear the DTC
B1C33-14	Steering Column Tilt Feedback Signal - Circuit short to ground or open	▪ Steering column tilt feedback signal circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the steering c feedback sign short circuit t open circuit, resistance. Re required, clea and retest
B1C34-11	Steering Column Telescope Solenoid - Circuit short to ground	▪ Steering column telescope solenoid circuit short circuit to ground ▪ Steering column tilt solenoid internal failure	**NOTE:** This compo serviceable

			▪ Refer to the e circuit diagra the steering c telescope sol for short circu Repair circuit clear the DTC ▪ If fault persist install a new s column telesc as required
B1C34-15	Steering Column Telescope Solenoid - Circuit short to battery or open	▪ Steering column telescope solenoid circuit short circuit to power, open circuit, high resistance ▪ Steering column tilt solenoid internal failure	**NOTE:** This compo serviceable ▪ Refer to the e circuit diagra the steering c telescope sol for short circu open circuit, resistance. Re required, clea and retest ▪ If fault persist install a new s column telesc as required
B1C35-12	Steering Column Telescope Feedback Signal - Circuit short to battery	▪ Steering column telescope feedback signal circuit short circuit to power	▪ Refer to the e circuit diagra the steering c telescope fee circuit for sho power. Repai required, clea and retest

B1C35-14	Steering Column Telescope Feedback Signal - Circuit short to ground or open	▪ Steering column telescope feedback signal circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the steering c telescope fee circuit for sho ground, open resistance. Re required, clea and retest
B1C36-11	Steering Column Adjust Switch - Circuit short to ground	▪ Steering column adjustment switch circuit short circuit to ground	▪ Refer to the e circuit diagra the steering c adjustment sv for short circu
B1C37-23	Master Lock Switch Stuck - Signal stuck low	▪ Front left door central door locking lock switch circuit short circuit to ground ▪ Front right door central door locking lock switch circuit short circuit to ground ▪ Front left door central door locking lock switch stuck active ▪ Front right door central door locking lock switch stuck active	▪ Refer to the e circuit diagra the front left door locking circuit for sho ground ▪ Refer to the e circuit diagra the front righ door locking circuit for sho ground ▪ Test the oper front left doo locking lock s ▪ Test the oper front right do door locking
B1C38-23	Master Unlock Switch Stuck - Signal stuck low	▪ Front left door central door locking unlock switch circuit short circuit to ground ▪ Front right door central door locking unlock switch circuit short circuit to ground ▪ Front left door central door locking unlock switch stuck active ▪ Front right door central door locking unlock switch stuck active	▪ Refer to the e circuit diagra the front left door locking circuit for sho ground ▪ Refer to the e circuit diagra the front righ door locking circuit for sho ground ▪ Test the oper

				front left doo locking unloc ▪ Test the oper front right do door locking
	B1C43-23	Master Interior Lamp Switch Stuck - Signal stuck low	▪ Interior lamp switch circuit short circuit to ground ▪ Interior lamp switch stuck active	▪ Refer to the e circuit diagra the interior la circuit for sho ground ▪ Test the oper interior lamp
	B1C44-67	Rear Wiper Park Position Switch Stuck - Signal incorrect after event	▪ Rear wiper motor/mechanism seized/jammed ▪ Rear wiper motor park switch circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Rear wiper motor circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Check that th motor/mecha jammed/seize ▪ Refer to the e circuit diagra the rear wipe switch circuit circuit to grou circuit to pow circuit, high r ▪ Refer to the e circuit diagra the rear wipe for short circu short circuit t open circuit, resistance
	B1C45-67	Front Wiper Park Position Switch Stuck - Signal incorrect after event	▪ Front wiper motor/mechanism seized/jammed ▪ Front wiper motor park switch circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Front wiper motor circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Check that th motor/mecha jammed/seize ▪ Refer to the e circuit diagra the front wipe switch circuit circuit to grou circuit to pow circuit, high r ▪ Refer to the e circuit diagra the front wipe circuit for sho ground, short

			power, open resistance
B1C55-12	Horn Relay - Circuit short to battery	▪ Horn relay circuit short circuit to power	▪ Refer to the e circuit diagra the horn relay short circuit t
B1C55-14	Horn Relay - Circuit short to ground or open	▪ Horn relay circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the horn relay short circuit t open circuit, resistance
B1C77-12	Rear Wiper Relay - Circuit short to battery	▪ Rear wiper circuit short circuit to power	▪ Refer to the e circuit diagra the rear wipe short circuit t
B1C77-14	Rear Wiper Relay - Circuit short to ground or open	▪ Rear wiper circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the rear wipe short circuit t open circuit, resistance
B1C79-11	Front Washer Pump - Circuit short to ground	▪ Washer pump circuits short circuit to ground	▪ Refer to the e circuit diagra the washer pu for short circu
B1C79-12	Front Washer Pump - Circuit short to battery	▪ Washer pump circuits short circuit to power	▪ Refer to the e circuit diagra the washer pu for short circu
B1C79-13	Front Washer Pump - Circuit open	▪ Washer pump circuit open circuit, high resistance	▪ Refer to the e circuit diagra the washer pu for open circu resistance
B1C82-12	Headlamp Washer Relay A - Circuit short	▪ Headlamp washer jet relay circuits short circuit to power	▪ Refer to the e circuit diagra

	to battery		the headlamp relay circuits circuit to pow
B1C82-14	Headlamp Washer Relay A - Circuit short to ground or open	▪ Headlamp washer jet relay circuits short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the headlamp relay circuits circuit to grou circuit, high r
B1C84-12	Heated Rear Window Relay Output - Circuit short to battery	▪ Heated rear window relay circuit short circuit to power	▪ Refer to the e circuit diagra the heated re relay circuit fo to power
B1C84-14	Heated Rear Window Relay Output - Circuit short to ground or open	▪ Heated rear window relay circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the heated re relay circuit fo to ground, op high resistanc
B1C90-12	Auxiliary Driving Lamps Relay - Circuit short to battery	▪ Auxiliary driving lamps relay circuit short circuit to power	**NOTE:** This DTC re hardwired d lamps circui from the bo module that used for aftermarket fitting. The not used on standard ve required for aftermarket ▪ Refer to the e circuit diagra the auxiliary relay circuit fo to power
B1C90-	Auxiliary Driving	▪ Auxiliary driving lamps relay circuit short circuit	

14	Lamps Relay - Circuit short to ground or open	to ground, open circuit, high resistance	**NOTE:** This DTC re hardwired d lamps circui from the bo module that used for aftermarket fitting. The not used on standard ve required for aftermarket ▪ Refer to the e circuit diagra the auxiliary relay circuit f to ground, o high resistan
B1C91-11	Fuel Flap/Door Lock Relay Coil Circuit - Circuit short to ground	▪ Fuel flap release motor circuit(s) short circuit to ground	▪ Refer to the e circuit diagra the fuel flap r circuit(s) for s ground
B1C91-12	Fuel Flap/Door Lock Relay Coil Circuit - Circuit short to battery	▪ Fuel flap release motor circuit(s) short circuit to power	▪ Refer to the e circuit diagra the fuel flap r circuit(s) for s power
B1C91-15	Fuel Flap/Door Lock Relay Coil Circuit - Circuit short to battery or open	▪ Fuel flap release motor circuit(s) short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the fuel flap r circuit(s) for s power, open resistance
B1C91-1D	Fuel Flap/Door Lock Relay Coil Circuit - Circuit current out of range	▪ Fuel flap release motor circuit(s) short circuit to ground, short circuit to power, open circuit, high resistance ▪ Fuel flap release motor internal failure	▪ Refer to the e circuit diagra the fuel flap r circuit(s) for s ground, short power, open

				resistance ▪ Using the ma approved dia system, clear retest. If the install a new release moto
	B1C96-11	Alarm LED - Circuit short to ground	▪ Security system status indicator circuit short circuit to ground	▪ Refer to the circuit diagra the security s indicator circ circuit to grou
	B1C96-12	Alarm LED - Circuit short to battery	▪ Security system status indicator circuit short circuit to power	▪ Refer to the circuit diagra the security s indicator circ circuit to pow
	B1C98-04	Left Corner Lamp Circuit - System internal failures	▪ Left headlamp failure	▪ Using the ma approved dia system, clear retest. If the install a new
	B1C98-11	Left Corner Lamp Circuit - Circuit short to ground	▪ Left side cornering lamp circuit short circuit to ground ▪ Lamp fault	▪ Refer to the circuit diagra the left side lamp circuit f to ground. Re required, clea and retest ▪ If the fault pe new left head
	B1C98-15	Left Corner Lamp Circuit - Circuit short to battery or open	▪ Left side cornering lamp circuit short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the circuit diagra the left side lamp circuit f to power, ope high resistanc circuit as requ the DTCs and ▪ If the fault pe new left head

B1C98-29	Left Corner Lamp Circuit - Signal invalid	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp power or ground circuit open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the left headl and ground c open circuit, resistance ▪ Clear the DT If the fault pe new left head
B1C98-84	Left Corner Lamp Circuit - Signal below allowable range	▪ Left cornering lamp circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the left corne circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ Clear the DT If the fault pe new left head
B1C98-85	Left Corner Lamp Circuit - Signal above allowable range	▪ Left cornering lamp circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the left corne circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open

				resistance ▪ Clear the DT(If the fault pe new left heac
	B1C99-04	Right Corner Lamp Circuit - System internal failures	▪ Right headlamp failure	▪ Using the ma approved dia system, clear retest. If the f install a new r headlamp
	B1C99-11	Right Corner Lamp Circuit - Circuit short to ground	▪ Right side cornering lamp circuit short circuit to ground ▪ Lamp fault	▪ Refer to the e circuit diagra the right side lamp circuit fo to ground. Re required, clea and retest ▪ If the fault pe new right hea
	B1C99-15	Right Corner Lamp Circuit - Circuit short to battery or open	▪ Right side cornering lamp circuit short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the right side lamp circuit fo to power, ope high resistanc circuit as requ the DTCs and ▪ If the fault pe new right hea
	B1C99-29	Right Corner Lamp Circuit - Signal invalid	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp power or ground circuit open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the right hea and ground c open circuit, resistance ▪ Clear the DT(

				If the fault pe new right hea
	B1C99-84	Right Corner Lamp Circuit - Signal below allowable range	▪ Right cornering lamp circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the right corr circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Clear the DT If the fault pe new right hea
	B1C99-85	Right Corner Lamp Circuit - Signal above allowable range	▪ Right cornering lamp circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the right corr circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Clear the DT If the fault pe new right hea
	B1D00-04	Left Low Beam - System internal failures	▪ Left headlamp failure	▪ Using the ma approved dia system, clear retest. If the f install a new
	B1D00-11	Left Low Beam - Circuit short to	▪ Left headlamp low beam circuit short circuit to ground	▪ Refer to the e circuit diagra

	ground		the left headl beam circuit circuit to grou
B1D00-15	Left Low Beam - Circuit short to battery or open	▪ Left headlamp low beam circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the left headl beam circuit circuit to pow circuit, high r
B1D00-23	Left Low Beam - Signal Stuck Low	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp low beam circuit short circuit to ground, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the left headl beam circuit circuit to grou circuit, high r ▪ Clear the DTC If the fault pe new left head
B1D00-24	Left Low Beam - Signal Stuck High	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp low beam circuit short circuit to power ▪ Lamp fault	▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the left headl beam circuit circuit to pow ▪ Clear the DTC If the fault pe new left head
B1D00-86	Left Low Beam - Signal invalid	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp low beam circuit short circuit to	▪ Refer to the e circuit diagra the left headl

			ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the left headl beam circuit f circuit to grou circuit to pow circuit, high r ▪ Clear the DTC If the fault pe new left head
	B1D00-92	Left Low Beam - Performance Or Incorrect Operation	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp low beam circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the left headl beam circuit f circuit to grou circuit to pow circuit, high r ▪ Clear the DTC If the fault pe new left head
	B1D01-04	Right Low Beam - System internal failures	▪ Right headlamp failure	▪ Using the ma approved dia system, clear retest. If the f install a new r headlamp
	B1D01-11	Right Low Beam - Circuit short to ground	▪ Right headlamp low beam circuit short circuit to ground	▪ Refer to the e circuit diagra the right head beam circuit f circuit to grou
	B1D01-	Right Low Beam -	▪ Right headlamp low beam circuit short circuit to	▪ Refer to the e

15	Circuit short to battery or open	power, open circuit, high resistance	circuit diagra the right hea beam circuit circuit to pow circuit, high r
B1D01-23	Right Low Beam - Signal Stuck Low	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp low beam circuit short circuit to ground, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the right hea beam circuit circuit to grou circuit, high r ▪ Clear the DT If the fault pe new right hea
B1D01-24	Right Low Beam - Signal Stuck High	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp low beam circuit short circuit to power ▪ Lamp fault	▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the right hea beam circuit circuit to pow ▪ Clear the DT If the fault pe new right hea
B1D01-86	Right Low Beam - Signal invalid	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp low beam circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra

				the right hea beam circuit circuit to gro circuit to pow circuit, high r ▪ Clear the DT If the fault pe new right hea
	B1D01-92	Right Low Beam - Performance Or Incorrect Operation	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp low beam circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the right hea beam circuit circuit to gro circuit to pow circuit, high r ▪ Clear the DT If the fault pe new right hea
	B1D02-04	Left High Beam - System internal failures	▪ Left headlamp failure	▪ Using the ma approved dia system, clear retest. If the install a new
	B1D02-11	Left High Beam - Circuit short to ground	▪ Left headlamp high beam circuit short circuit to ground	▪ Refer to the e circuit diagra the left headl beam circuit circuit to gro
	B1D02-15	Left High Beam - Circuit short to battery or open	▪ Left headlamp high beam circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the left headl beam circuit circuit to pow circuit, high r
	B1D02-	Left High Beam -	▪ LIN bus circuit short circuit to ground, short	▪ Refer to the e

	23	Signal Stuck Low	circuit to power, open circuit, high resistance ▪ Left headlamp high beam circuit short circuit to ground, open circuit, high resistance ▪ Lamp fault	circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the left headl beam circuit circuit to grou circuit, high r ▪ Clear the DT If the fault pe new left head
	B1D02-24	Left High Beam - Signal Stuck High	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp high beam circuit short circuit to power ▪ Lamp fault	▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the left headl beam circuit circuit to pow ▪ Clear the DT If the fault pe new left head
	B1D02-86	Left High Beam - Signal invalid	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp high beam circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the left headl circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the left headl beam circuit circuit to grou circuit to pow circuit, high r ▪ Clear the DT If the fault pe

			new left heac
B1D03-04	Right High Beam - System internal failures	▪ Right headlamp failure	▪ Using the ma approved dia system, clear retest. If the t install a new r headlamp
B1D03-11	Right High Beam - Circuit short to ground	▪ Right headlamp high beam circuit short circuit to ground	▪ Refer to the e circuit diagra the right hea beam circuit circuit to grou
B1D03-15	Right High Beam - Circuit short to battery or open	▪ Right headlamp high beam circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the right hea beam circuit circuit to pow circuit, high r
B1D03-23	Right High Beam - Signal Stuck Low	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp high beam circuit short circuit to ground, open circuit, high resistance ▪ Lamp fault	▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Refer to the e circuit diagra the right hea beam circuit circuit to grou circuit, high r ▪ Clear the DT If the fault pe new right hea
B1D03-24	Right High Beam - Signal Stuck High	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp high beam circuit short circuit to power ▪ Lamp fault	▪ Refer to the e circuit diagra the right hea circuit for sho ground, short power, open resistance ▪ Refer to the e

			▪ circuit diagra the right hea beam circuit circuit to pow ▪ Clear the DT If the fault pe new right hea
B1D03-86	Right High Beam - Signal invalid	▪ LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp high beam circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Lamp fault	▪ Refer to the circuit diagra the right hea circuit for sho ground, shor power, open resistance ▪ Refer to the circuit diagra the right hea beam circuit circuit to grou circuit to pow circuit, high r ▪ Clear the DT If the fault pe new right hea
B1D08-11	Left Trailer Direction Indicator Circuit - Circuit short to ground	▪ Trailer left turn signal indicator circuit short circuit to ground	▪ Refer to the circuit diagra the trailer lef indicator circ circuit to grou
B1D09-11	Right Trailer Direction Indicator Circuit - Circuit short to ground	▪ Trailer right turn signal indicator circuit short circuit to ground	▪ Refer to the circuit diagra the trailer rig indicator circ circuit to grou
B1D13-11	Interior Lights Circuit "A" - Circuit short to ground	▪ Interior lamp circuits short circuit to ground	▪ Refer to the circuit diagra the interior la for short circu
B1D13-12	Interior Lights Circuit "A" - Circuit short to battery	▪ Interior lamp circuits short circuit to power	▪ Refer to the circuit diagra the interior la for short circu

B1D13-15	Interior Lights Circuit "A" - Circuit short to battery or open	▪ Interior lamp circuits short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the interior la for short circu open circuit, resistance
B1D14-11	Interior Lights Circuit "B" - Circuit short to ground	▪ Demand interior lamp circuits short circuit to ground	▪ Refer to the e circuit diagra the demand i circuits for sh ground
B1D17-87	Battery Backed Sounder - Missing message	▪ Battery back-up sounder circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Battery back-up sounder failure	▪ Refer to the e circuit diagra the battery b sounder circu circuit to grou circuit to pow circuit, high r ▪ Using the ma approved dia system, clear retest. If the install a new up sounder
B1D17-96	Battery Backed Sounder - Component internal failure	▪ Battery back-up sounder circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Battery back-up sounder power or ground circuits short circuit to ground, short circuit to power, open circuit, high resistance ▪ Battery back-up sounder failure	▪ Refer to the e circuit diagra the battery b sounder circu circuit to grou circuit to pow circuit, high r ▪ Refer to the e circuit diagra the battery b sounder pow circuits for sh ground, short power, open resistance ▪ Using the ma approved dia system, clear retest. If the install a new

				up sounder
	B1D35-23	Hazard Switch Stuck - Signal stuck low	- Hazard switch circuit short circuit to ground - Hazard switch stuck active	- Refer to the e circuit diagra the hazard sw for short circu - Test the oper hazard switch
	B1D36-11	Turn Indicator Switch - Circuit short to ground	- Turn signal indicator switch circuit short circuit to ground - Switch fault	- Refer to the e circuit diagra the turn signa switch circuit circuit to grou circuit as requ the DTCs and - If fault persist install a new t indicator swit required. Cle and retest
	B1D36-15	Turn Indicator Switch - Circuit short to battery or open	- Turn signal indicator switch circuit short circuit to power, open circuit, high resistance - Switch fault	- Refer to the e circuit diagra the turn signa switch circuit circuit to pow circuit, high r Repair circuit clear the DTC - If fault persist install a new t indicator swit required. Cle and retest
	B1D64-01	Left Headlamp Swivelling Motor - General electrical failure	- Adaptive front lighting LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance - Left headlamp swivelling motor error	- Check the he connections, DTC, switch c and allow suf for the modu down, then re - If the fault pe the electrical diagrams and adaptive fron bus circuit fo

				to ground, sh power, open resistance. Re required, clea and retest ▪ If the fault pe and install a r as required
	B1D64-04	Left Headlamp Swivelling Motor - System internal failures	▪ Adaptive front lighting LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Left headlamp swivelling motor error	▪ Check the he connections, DTC, switch o and allow suf for the modu down, then re ▪ If the fault pe the electrical diagrams and adaptive fron bus circuit for to ground, sh power, open resistance. Re required, clea and retest ▪ If the fault pe and install a r as required
	B1D64-87	Left Headlamp Swivelling Motor - Missing message	▪ Left headlamp swivelling motor missing message ▪ Adaptive front lighting LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Check the he connections. electrical circ and check po ground suppl body control Clear the DTC ▪ If the fault pe the electrical diagrams and adaptive fron bus circuit for to ground, sh power, open resistance. Re required, clea and retest ▪ If the fault pe and install a r as required

	B1D65-01	Right Headlamp Swivelling Motor - General electrical failure	▪ Adaptive front lighting LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp swivelling motor error	▪ Check the he connections, DTC, switch c and allow suf for the modu down, then re ▪ If the fault pe the electrical diagrams and adaptive fron bus circuit for to ground, sh power, open resistance. Re required, clea and retest ▪ If the fault pe and install a r as required
	B1D65-04	Right Headlamp Swivelling Motor - System internal failures	▪ Adaptive front lighting LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Right headlamp swivelling motor error	▪ Check the he connections, DTC, switch c and allow suf for the modu down, then re ▪ If the fault pe the electrical diagrams and adaptive fron bus circuit for to ground, sh power, open resistance. Re required, clea and retest ▪ If the fault pe and install a r as required
	B1D65-87	Right Headlamp Swivelling Motor - Missing message	▪ Right headlamp swivelling motor missing message ▪ Adaptive front lighting LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	▪ Check the he connections. electrical circ and check po ground suppl body control Clear the DTC

				- If the fault pe the electrical diagrams and adaptive fron bus circuit fo to ground, sh power, open resistance. Re required, clea and retest - If the fault pe and install a r as required
	B1D68-00	Left Headlamp Swivelling Feedback Sensor - No sub type information	- Left headlamp swivelling feedback sensor not detected - Adaptive front lighting LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	- Check the he connector fo integrity - Refer to the e circuit diagra headlamp cir circuit as requ the DTCs and - If the fault pe the electrical diagrams and adaptive fron bus circuit fo to ground, sh power, open resistance. Re required, clea and retest - If the fault pe and install a r as required
	B1D69-00	Right Headlamp Swivelling Feedback Sensor - No sub type information	- Right headlamp swivelling feedback sensor not detected - Adaptive front lighting LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance	- Check the he connector fo integrity - Refer to the e circuit diagra headlamp cir circuit as requ the DTCs and - If the fault pe the electrical diagrams and adaptive fron

				bus circuit fo to ground, sh power, open resistance. Re required, clea and retest ▪ If the fault pe and install a r as required
	B1D97-96	Tilt Sensor - Component internal failure	▪ Battery back-up sounder power or ground circuit(s) open circuit, high resistance ▪ Battery back-up sounder LIN bus circuit short circuit to ground, short circuit to power, open circuit, high resistance ▪ Battery back-up sounder failure	▪ Refer to the e circuit diagra the battery b sounder pow circuit(s) for c high resistanc circuit as requ the DTCs and ▪ If the fault pe the electrical diagrams and battery back- LIN bus circui circuit to grou circuit to pow circuit, high r Repair circuit clear the DTC ▪ If the fault pe new battery b sounder
	C111A-11	Right Stop Lamp - Circuit short to ground	▪ Right stop lamp circuit short circuit to ground	▪ Refer to the e circuit diagra the right stop for short circu
	C111A-15	Right Stop Lamp - Circuit short to battery or open	▪ Right stop lamp circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the right stop for short circu open circuit, resistance
	C111B-11	Left Stop Lamp - Circuit short to ground	▪ Left stop lamp circuit short circuit to ground	▪ Refer to the e circuit diagra the left stop l for short circu

C111B-15	Left Stop Lamp - Circuit short to battery or open	▪ Left stop lamp circuit short circuit to power, open circuit, high resistance	▪ Refer to the e circuit diagra the left stop l for short circu open circuit, resistance
C112B-12	Isolation Switch - Circuit short to battery	▪ Deployable spoiler inhibitor relay circuit short circuit to power	▪ Refer to the e circuit diagra the deployab inhibitor relay short circuit t Repair circuit clear the DTC
C112B-14	Isolation Switch - Circuit short to ground or open	▪ Deployable spoiler inhibitor relay circuit short circuit to ground, open circuit, high resistance	▪ Refer to the e circuit diagra the deployab inhibitor relay short circuit t open circuit, resistance. Re required, clea and retest
C1A04-12	Right Front Height Sensor - Circuit Short To Battery	**NOTE:** This an Integrated Suspension Control Module(ISCM) fault, check ISCM for related DTCs ▪ Front right height sensor circuit short circuit power ▪ Front right height sensor internal failure	**NOTE:** If any heigh fixings were slackened o be loose or sensor was the vehicle height MUS calibrated ▪ To check heig disconnect el connector to and inspect c & terminals f corrosion or If no corrosio disconnect ha control modu steps below

				▪ Check for sho between any terminals and Repair circuit ▪ Check for ele continuity be two connecto the three terr circuit as requ Reconnect el connector at module only ▪ Check voltag terminals with sensor conne sensor not co voltage to se connection sh voltage to se connection sh voltage to se connection sh All voltages s within ± 0.15 circuit as requ the DTCs and ▪ If the fault pe new height se the DTCs and
	C1A04-14	Right Front Height Sensor - Circuit short to ground or open	**NOTE:** This an Integrated Suspension Control Module(ISCM) fault, check ISCM for related DTCs ▪ Front right height sensor connector loose ▪ Front right height sensor circuit short circuit to ground, open circuit, high resistance ▪ Front right height sensor circuit short circuit to another circuit ▪ Front right height sensor internal failure	**NOTE:** If any heigh fixings were slackened o be loose or sensor was the vehicle height MUS calibrated ▪ To check heig disconnect el connector to and inspect c & terminals fo corrosion or If no corrosio disconnect ha

				control modu steps below ▪ Check for sho between any terminals and ground. Repa required ▪ Check for ele continuity be two connecto the three terr circuit as requ Reconnect el connector at module only ▪ Check voltag terminals witl sensor conne sensor not co voltage to se connection sl voltage to se connection sl voltage to se connection sl All voltages s within ± 0.15 circuit as requ the DTCs and ▪ If the fault pe new height se the DTCs and
	C1A04-64	Right Front Height Sensor - Signal plausibility failure	**NOTE:** This an Integrated Suspension Control Module(ISCM) fault, check ISCM for related DTCs ▪ Front right height sensor performance not as expected, lowering slower than expected ▪ Axle valve block pipes connected incorrectly ▪ Blocked/damaged or crushed air spring pipe ▪ Blocked/damaged or crushed gallery pipe ▪ Front right height sensor internal failure	**NOTE:** If any heigh fixings were slackened o be loose or sensor was the vehicle height MUS calibrated ▪ Check the fro valve block p correct routir

			▪ Front right height sensor incorrectly installed ▪ Suspension movement obstructed ▪ Reservoir valve stuck open (mechanically)	installation. R as required, c and retest ▪ Check the air evidence of r crushing, kink collapsing. Re as required, c and retest ▪ Refer to the a diagnostic sy corner and re checks. Repa required, clea and retest ▪ Check that th free of obstru the height se correct instal torque of fixi fixings requir re-calibrate t using the app diagnostic sy the DTCs and ▪ Visually inspe sensor for sec damage and orientation/in Check the se connector fo Repair/renew clear the DTC
	C1A06-12	Right Rear Height Sensor - Circuit Short To Battery	**NOTE:** This an Integrated Suspension Control Module(ISCM) fault, check ISCM for related DTCs ▪ Rear right height sensor circuit short circuit power ▪ Rear right height sensor internal failure	**NOTE:** If any heigh fixings were slackened o be loose or sensor was the vehicle r height MUS calibrated ▪ To check heig disconnect el connector to

				and inspect c & terminals fo corrosion or v If no corrosio disconnect ha control modu steps below ▪ Check for sho between any terminals and Repair circuit ▪ Check for ele continuity be two connecto the three terr circuit as requ Reconnect el connector at module only ▪ Check voltag terminals wit sensor conne sensor not co voltage to se connection sh voltage to se connection sh voltage to se connection sh All voltages s within ± 0.15 circuit as requ the DTCs and ▪ If the fault pe new height se the DTCs and
